

Fund guide

abrdr SICAV I – Diversified Income Fund

March 2026

Important information

1. The Fund invests in an actively managed diversified portfolio of transferable securities across a wide range of global asset classes.
2. The Fund is exposed to risks related to equity, debt securities, investing in sub-investment grade and/or unrated debt securities, sovereign debt, contingent convertible bonds, dynamic asset allocation strategy, investing in emerging markets and exchange rates.
3. The Fund follows abrdr's "Diversified Income Promoting ESG Investment Approach" and is therefore subject to ESG investment policy risks.
4. The Fund's net derivative exposure may be up to 50% of the Fund's net asset value, securities lending transactions and subject to counterparty/ credit risk, liquidity risk, valuation risk, volatility risk and over-the-counter transaction risk.
5. The Fund may at its discretion pay dividends out of the capital of the Fund. Payment of dividends out of capital amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. Any distributions involving payment of dividends out of the Fund's capital or payment of dividends effectively out of the Fund's capital (as the case may be) may result in an immediate reduction of the net asset value per share.
6. Fixed distribution shares will declare and distribute a fixed rate per annum (which will be pro-rated accordingly depending on the relevant distribution frequency), regardless of the performance of the Fund. Investments in fixed distribution shares are not an alternative to a savings account or fixed-interest paying investment. A positive distribution yield does not imply a positive return.
7. Investment in the Fund may involve a high degree of risk and may not be suitable for all investors. It is possible that the entire value of the investment could be lost.
8. Investors should not solely rely on this document to make any investment decision and should read the relevant offering documents for further details including risk factors before investing.

Why diversified assets for income?

Reduced correlation

Increased correlation between equities and bonds means **traditional multi-asset funds might fail to provide sufficient diversification in down markets.**

Genuine diversification

Traditional asset classes are sensitive to economic cycles. **Listed alternatives** such as real estate, infrastructure and special opportunities **are less tied to economic cycles and so offer diversification potential.**

Access to stable income

Listed alternatives can offer more stable and diversified sources of income than traditional market assets.

abrdrn SICAV I – Diversified Income Fund

Key benefits of investing in abrdrn SICAV I – Diversified Income Fund

Monthly income

Enjoy stable and repeatable monthly income of

7.0% p.a.¹

Diversified exposure

Diversified sources of income from a wide range of traditional and alternative asset classes.

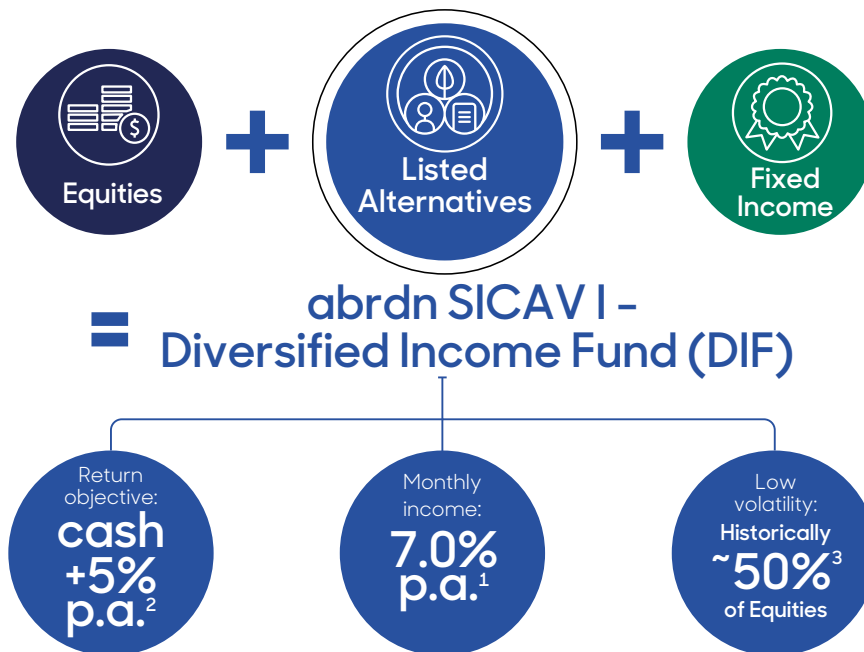

Ease of access

Capture **investment opportunities** that previously were hard to access but are now listed and liquid.

1. Access the key asset classes with ease

Differentiated return drivers through listed alternatives. They can reduce the sensitivity to the economic cycles.

¹ Source: Aberdeen Investments, based on annualised yield of Class A Fixed MIncA USD, March 2026. Annualised Yield = (Dividend per share/Price (ex-dividend)) x 12 (months) x 100%. Dividend rate is not guaranteed. Dividend may be paid out of capital. Please refer to important information 5 and 6. A positive yield does not imply a positive return of the Fund.

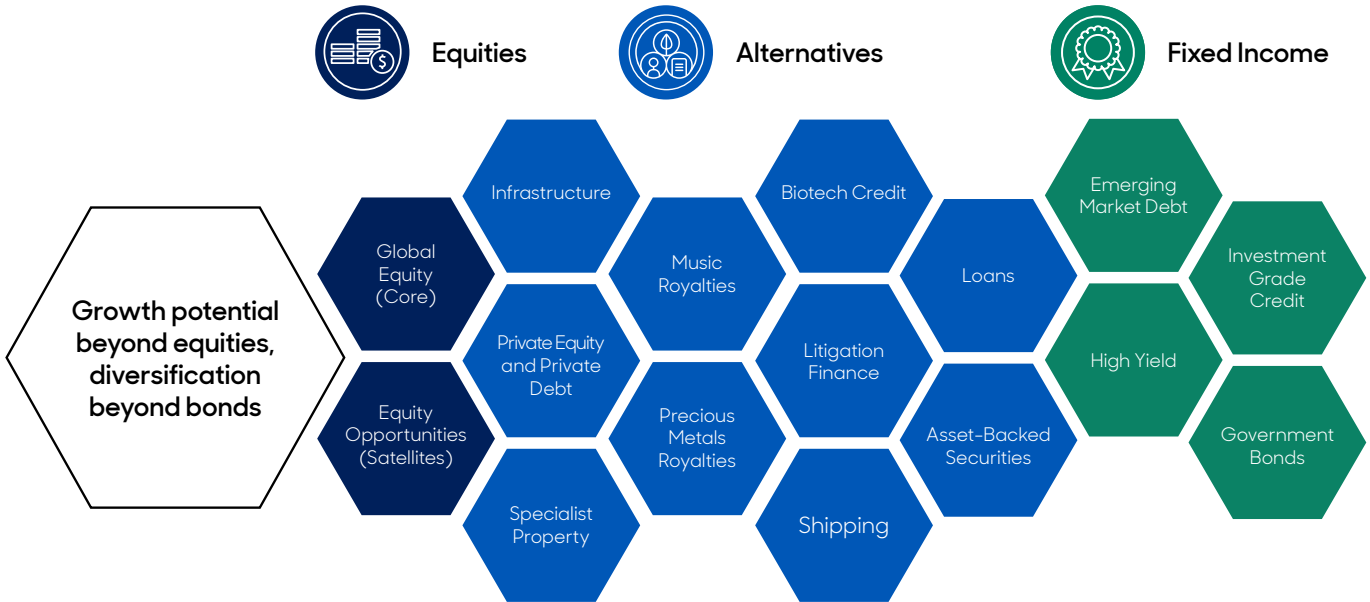

² Cash deposits are measured by US Secured Overnight Financing Rate ("SOFR"). Return objective is gross of annual management charge. This is an internal performance target which the Investment Manager aims to achieve over rolling five year periods as at the date of this document. This target is not based on past performance, may be subject to change and cannot be guaranteed. Investors should always refer to the investment objective and restrictions as stated in the latest prospectus.

abrdn SICAV I – Diversified Income Fund

2. A truly diversified portfolio

The investment manager actively manages the Fund and uses discretion to identify a diverse mix of investments they deem most appropriate for the investment objective.

Consequently, during extreme downturns, losses are expected to be significantly below those of conventional global equity markets.

Blending listed alternatives into the fund helped cushion the drawdowns⁴

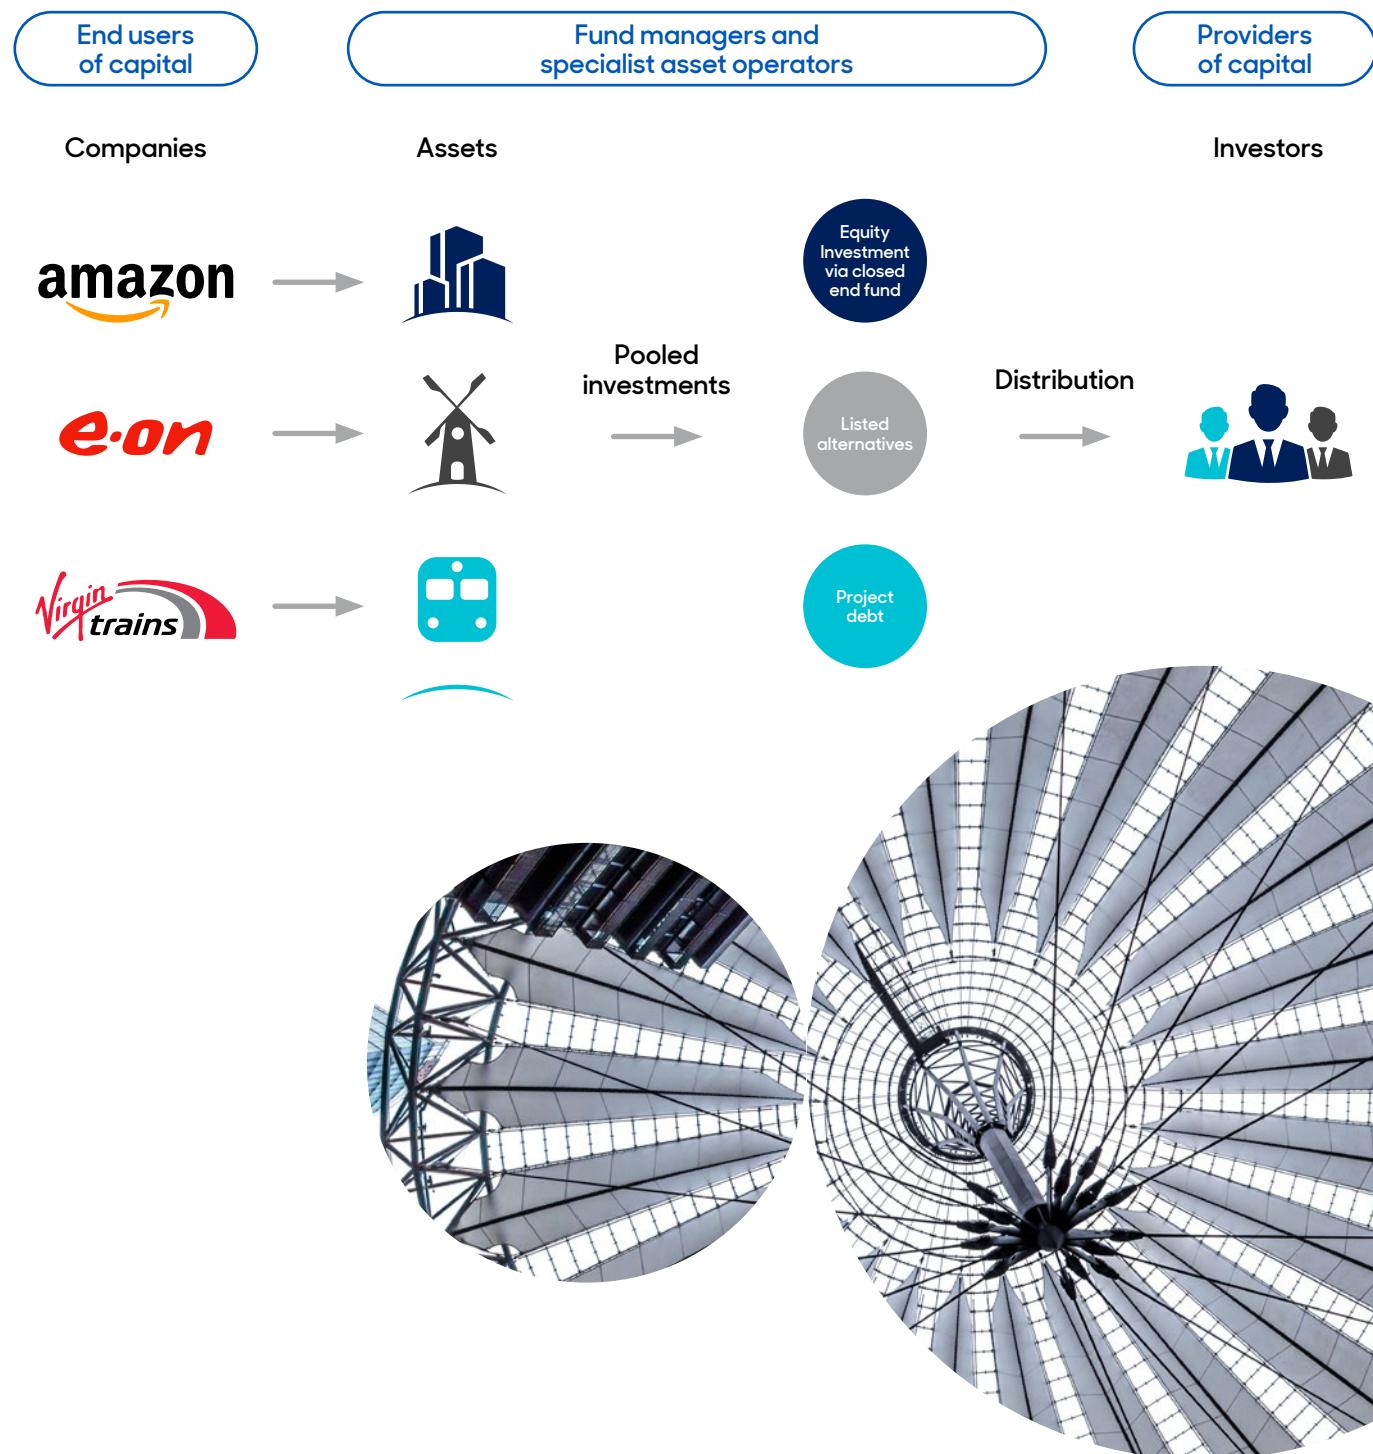

⁴ Sources: Bloomberg, March 2026. Past performance is not indicative of future results. Global equities are represented by the MSCI World Hedged to USD Index, total return.

How do listed alternatives work⁵?

Alternatives are financial assets that fall outside the definition of conventional asset classes (namely Equities, Fixed Income and Multi-Assets). Alternatives include infrastructure, asset-backed securities and special opportunities. Through mutual funds, investors can gain access to these distinctive assets that are typically inflation-linked or can potentially provide long-term cashflows.

⁶ The Ongoing Charge Figure (OCF) is the overall cost shown as a percentage of the value of the assets of the fund. It is made up of the Annual Management Charge (AMC) of 0.95% and other charges. It does not include any initial charges or the cost of buying and selling stocks for the fund. The Ongoing Charges figure can help you compare the annual operating expenses of different funds. There are other applicable costs. The other operating charges figure (OOC) is the total expenses paid by each share class, against its average net asset value. This includes the annual management charge, the other operating expenses, and any synthetic element to incorporate the ongoing charges of any underlying qualifying investments. The OOC can fluctuate as underlying costs change. Where underlying costs have changed, the OOC disclosed in the Fund offering Documents will be updated to reflect current changes.

⁷ Distributable income refers to the interest and dividend income, and may take into consideration the net realised gains, a fund receives from its portfolio holdings and are payable to its investors. It is net of all fees and expenses, including management fees and distribution cost. There was an exceptional month in the past twelve months that dividend was not fully paid out of net distributable income. Please refer to dividend compositions disclosure report on our website for details.

⁸ Annualised Yield = (Dividend per share/Price (ex-dividend)) x 12 (months) x 100%. Aim at monthly distribution. Dividend rate is not guaranteed. Dividend may be paid out of capital. Please refer to important information 5 and 6. A positive yield does not imply a positive return of the Fund.
