

Fund guide abrln SICAV I – Diversified Income Fund

March 2026

Why Diversified Assets for income?

Reduced correlation

Increased correlation between equities and bonds means **traditional Multi-Asset Funds might fail to provide sufficient diversification in down markets.**

Genuine diversification

Traditional asset classes are sensitive to economic cycles. **Listed alternatives** such as real estate, infrastructure and special opportunities **are less tied to economic cycles and so offer diversification potential.**

Access to stable income

Listed alternatives can offer more stable and diversified sources of income than traditional market assets.

Key benefits of investing in abrln SICAV I – Diversified Income Fund

Monthly income

Enjoy stable and repeatable monthly income of **approximately 5.27% p.a.**¹

Diversified exposure

Diversified sources of income from a wide range of traditional and alternative asset classes.

Ease of access

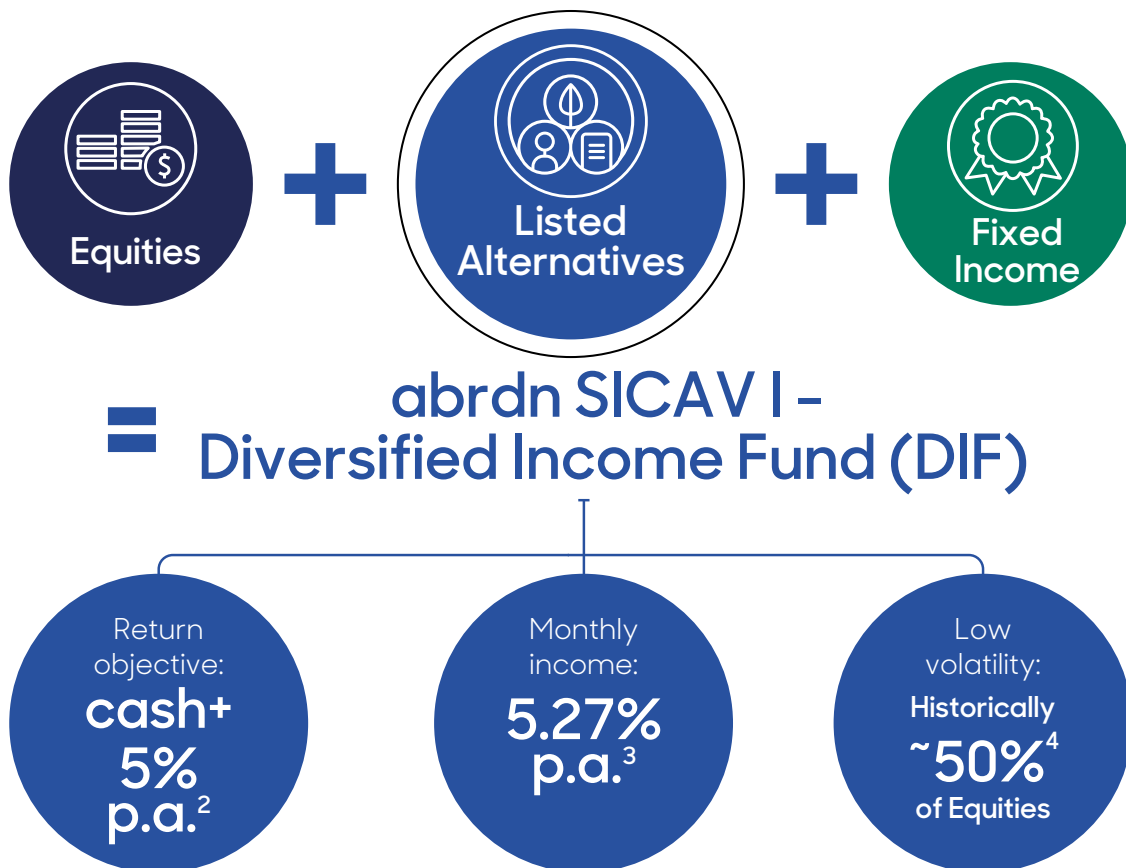

Capture **investment opportunities** that previously were hard to access but are now listed and liquid.

1. Access the key asset classes with ease

Differentiated return drivers through Listed Alternatives. They can reduce the sensitivity to the economic cycles.

² Cash deposits are measured by US Secured Overnight Financing Rate ("SOFR"). Return objective is gross of annual management charge. This is an internal performance target which the Investment Manager aims to achieve over rolling five year periods as at the date of this document. This target is not based on past performance, may be subject to change and cannot be guaranteed. Investors should always refer to the investment objective and restrictions as stated in the latest prospectus.

2. A truly diversified portfolio

The Investment Manager actively manages the Fund and uses discretion to identify a diverse mix of investments they deem most appropriate for the investment objective.

Consequently, during extreme downturns, losses are expected to be below those of conventional global equity markets, with volatility (a measure of the size of changes in the value of an investment) **typically ~50% less than equities**.

Blending listed alternatives into the fund helped cushion the drawdowns⁵

How do listed alternatives work⁶?

Alternatives are financial assets that fall outside the definition of conventional asset classes (namely Equities, Fixed Income and Multi-Assets). Alternatives include infrastructure, asset-backed securities and special opportunities. Through mutual funds, investors can gain access to these distinctive assets that are typically inflation-linked or can potentially provide long-term cashflows.

⁷ The Ongoing Charge Figure (OCF) is the overall cost shown as a percentage of the value of the assets of the fund. It is made up of the Annual Management Charge (AMC) of 0.95% and other charges. It does not include any initial charges or the cost of buying and selling stocks for the fund. The Ongoing Charges figure can help you compare the annual operating expenses of different funds. There are other applicable costs. The other operating charges figure (OOC) is the total expenses paid by each share class, against its average net asset value. This includes the annual management charge, the other operating expenses, and any synthetic element to incorporate the ongoing charges of any underlying qualifying investments. The OOC can fluctuate as underlying costs change. Where underlying costs have changed, the OOC disclosed in the Fund offering Documents will be updated to reflect current changes.

⁸ Distributable income refers to the interest and dividend income, and may take into consideration the net realised gains, a fund receives from its portfolio holdings and are payable to its investors. It is net of all fees and expenses, including management fees and distribution cost.

⁹ Annualised Yield = (Dividend per share/Price (ex-dividend)) x 12 (months) x 100%. Aim at monthly distribution. Dividends are not guaranteed and may be paid out of investment income, capital gains or capital at the discretion of the Board of Directors. Any dividends paid and distributed out of the Fund's capital will result in an immediate reduction of the Fund's Net Asset Value per share. Past dividends are not a guide to future dividends.
