# Report of the Manager

## Continued

### Significant events

The military offensive from Russia against Ukraine since February 2022 continues to pose widespread sanctions on Russian assets. Geopolitical events, including recent developments in the Middle East can adversely affect assets of funds and performance thereon. To ensure the fair treatment of investors, Aberdeen's Investor Protection Committee (IPC) undertakes regular reviews of market liquidity across each asset class and fund, making appropriate adjustments where necessary.

Aberdeen's Valuation and Pricing Committee (VPC) also continue to review the valuation of assets and the recoverability of income from those assets making appropriate adjustments where necessary. The VPC is made up of a wide range of specialists across Aberdeen with a wide range of experience in asset pricing.

### Developments and prospectus updates since 1 February 2025

- On 18 February 2025, Fraser Peter Tulloch resigned as director of abrdn Fund Managers Limited.
- On 12 March 2025, any references to Aberdeen plc were updated to Aberdeen Group plc.
- On 12 May 2025, Donald Macmillan was added to the board of directors for abrdn Fund Managers Limited.
- On 2 June 2025, Martin Kwiatkowski resigned as director of abrdn Fund Managers Limited.
- On 15 July 2025, Emma Herd was added to the board of directors for abrdn Fund Managers Limited.
- The list of funds managed by the ACD was updated, where appropriate.
- Performance and dilution figures were refreshed, where appropriate.
- The list of sub-custodians was refreshed, where appropriate.
- The list of eligible markets was refreshed, where appropriate.
- The list of sub-investment advisors to the funds was refreshed, where appropriate.
- The risk disclosures in relation to the funds were refreshed, where appropriate.

### Assessment of Value (unaudited)

In 2017 the Financial Conduct Authority (FCA) published the final Asset Management Market Study. This introduced (among other reforms) new governance rules with the aim of enhancing duty of care and ensuring the industry acts in investors' best interests. The rules were outlined in the FCA policy statement PS18/8 and came into effect from 30 September 2019. As a result, abrdn Fund Managers Limited is required to perform a detailed assessment on whether our funds are "providing value to investors". The resulting findings will be published within 4 months of the fund year end date and can be found on the 'Fund Centre' pages of our website.

### Climate-related Financial Disclosures (unaudited)

The recommendations by the Taskforce for Climate-related Financial Disclosures (TCFD) – initiated by the Financial Stability Board in 2015 and adopted in 2017 – provide organisations with a consistent framework for disclosing financial impacts of climate-related risks and opportunities. The disclosure in line with TCFD recommendations enables external stakeholders to gain a better understanding of the climate-related risks and opportunities (including how they are managed) that are likely to impact the organisation's future financial position as reflected in its income statement, cash flow statement, and balance sheet. The TCFD has developed 11 recommendations which are structured around four thematic areas, notably governance, strategy, risk management and metrics and target. In Policy Statement 21/24 the Financial Conduct Authority (FCA) have created a regulatory framework for asset managers, life insurers and FCA-regulated pension providers to make climate-related disclosures consistent with the recommendations of the TCFD. As a result of the disclosure requirements the Fund is required to perform a detailed annual assessment, determining financial impacts of climate-related risks and opportunities. The resulting findings are published on our website at [Fund literature | aberdeen](#).

# Statement of Manager's Responsibilities

The Collective Investment Schemes sourcebook published by the FCA, ("the COLL Rules") require the Manager to prepare financial statements for each interim and annual accounting period which give a true and fair view of the financial position of the fund and of the net revenue and net capital gains on the property of the fund for the period.

In preparing the financial statements the Manager is responsible for:

- selecting suitable accounting policies and then applying them consistently;
- making judgements and estimates that are reasonable and prudent;
- following UK accounting standards, including FRS 102 The Financial Reporting Standard applicable in the UK and Republic of Ireland;
- complying with the disclosure requirements of the Statement of Recommended Practice for UK Authorised Funds issued by the Investment Association in May 2014;
- keeping proper accounting records which enable it to demonstrate that the financial statements as prepared comply with the above requirements;
- assessing the fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern;
- using the going concern basis of accounting unless they either intend to liquidate the fund or to cease operations, or have no realistic alternative but to do so;
- such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error; and
- taking reasonable steps for the prevention and detection of fraud and irregularities.

The Manager is responsible for the management of the fund in accordance with its Trust Deed, the Prospectus and the COLL Rules.

The Manager is responsible for the maintenance and integrity of the corporate and financial information included on its website. Legislation in the UK governing the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

## Manager's Statement

In accordance with the requirements of the COLL Rules as issued and amended by the Financial Conduct Authority, we hereby certify the report on behalf of abrdn Fund Managers Limited, the Authorised Fund Manager.

# Statement of the Trustee's Responsibilities in Respect of the Scheme and Report of the Trustee to the Unitholders of the abrdrn (Lothian) Pacific Basin Trust for the period ended 31 January 2026

It is the duty of the Trustee to take reasonable care to ensure that the Trust is managed in accordance with the Financial Conduct Authority's Collective Investment Schemes Sourcebook ("the Sourcebook"), the Financial Services and Markets Act 2000, as amended, (together "the Regulations"), and the Trust Deed and the Prospectus of the Trust (together "the Scheme documents") as detailed below.

The Trustee must in the context of its role act honestly, fairly, professionally, independently and in the interests of the Trust and its investors.

The Trustee is responsible for the safekeeping all custodial assets and maintaining a record of all other assets of the Trust in accordance with the Regulations.

The Trustee must ensure that:

- the Trust's cash flows are properly monitored, and that cash of the Trust is booked in cash accounts in accordance with the Regulations;
- the sale, issue, repurchase, redemption and cancellation of units are carried out in accordance with the Regulations;
- the value of units of the Trust are calculated in accordance with the Regulations;
- the Trust's income is applied in accordance with the Regulations; and
- the instructions of the Authorised Fund Manager ("the AFM"), which is the UCITS Management Company, are carried out (unless they conflict with the Regulations).

Having carried out procedures and enquiries considered duly necessary to discharge our responsibilities as Trustee of the scheme, based on information and explanations provided to us, we believe that, in all material respects, the AFM:

- (i) has carried out the issue, sale, redemption and cancellation, and calculation of the price of the Trust's units and the application of the Trust's income in accordance with the Regulation and the Scheme Documents of the Trust; and,
- (ii) has observed the investment and borrowing powers and restrictions applicable to the Trust.

**Citibank UK Limited**

27 April 2026

# Independent Auditor's Report to the Unitholders of the abrdn (Lothian) Pacific Basin Trust ("the fund")

## Opinion

We have audited the financial statements of the fund for the year ended 31 January 2026 which comprise the Statement of Total Return, the Statement of Change in Unitholders' Funds, the Balance Sheet, the Related Notes and Distribution Table for the fund and the accounting policies set out on pages 20 to 21.

In our opinion the financial statements:

- give a true and fair view, in accordance with UK accounting standards, including FRS 102 The Financial Reporting Standard applicable in the UK and Republic of Ireland, of the financial position of the fund as at 31 January 2026 and of the net revenue and the net capital gains on the property of the fund for the year then ended; and
- have been properly prepared in accordance with the Trust Deed, the Statement of Recommended Practice relating to Authorised Funds, and the COLL Rules.

## Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) ("ISAs (UK)") and applicable law. Our responsibilities are described below. We have fulfilled our ethical responsibilities under, and are independent of the fund in accordance with, UK ethical requirements including the FRC Ethical Standard.

We have received all the information and explanations which we consider necessary for the purposes of our audit and we believe that the audit evidence we have obtained is a sufficient and appropriate basis for our opinion.

## Going concern

The Manager has prepared the financial statements on the going concern basis as they do not intend to liquidate the fund or to cease their operations, and as they have concluded that the fund's financial position means that this is realistic. They have also concluded that there are no material uncertainties that could have cast significant doubt over their ability to continue as a going concern for at least a year from the date of approval of the financial statements ("the going concern period").

In our evaluation of the Manager's conclusions, we considered the inherent risks to the fund's business model and analysed how those risks might affect the fund's financial resources or ability to continue operations over the going concern period.

Our conclusions based on this work:

- we consider that the Manager's use of the going concern basis of accounting in the preparation of the financial statements is appropriate;

- we have not identified, and concur with the Manager's assessment that there is not, a material uncertainty related to events or conditions that, individually or collectively, may cast significant doubt on the fund's ability to continue as a going concern for the going concern period.

However, as we cannot predict all future events or conditions and as subsequent events may result in outcomes that are inconsistent with judgements that were reasonable at the time they were made, the above conclusions are not a guarantee that the fund will continue in operation.

## Fraud and breaches of laws and regulations – ability to detect

### Identifying and responding to risks of material misstatement due to fraud

To identify risks of material misstatement due to fraud ("fraud risks") we assessed events or conditions that could indicate an incentive or pressure to commit fraud or provide an opportunity to commit fraud. Our risk assessment procedures included:

- Enquiring of directors as to the fund's high-level policies and procedures to prevent and detect fraud, as well as whether they have knowledge of any actual, suspected or alleged fraud;
- Assessing the segregation of duties in place between the Manager, the Trustee, the Administrator and the Investment Adviser;
- Reading board minutes.

As required by auditing standards, we perform procedures to address the risk of management override of controls, in particular the risk that management may be in a position to make inappropriate accounting entries. On this audit we do not believe there is a fraud risk related to revenue recognition because the revenue is principally non-judgemental and based on publicly available information, with limited opportunity for manipulation. We did not identify any additional fraud risks.

We evaluated the design and implementation of the controls over journal entries and other adjustments and made inquiries of the Administrator about inappropriate or unusual activity relating to the processing of journal entries and other adjustments. We identified and selected a sample of journal entries made at the end of the reporting period and tested those substantively including all material post-closing entries. Based on the results of our risk assessment procedures and understanding of the process, including the segregation of duties between the Directors and the Administrator, no further high-risk journal entries or other adjustments were identified.

# Independent Auditor's Report to the Unitholders of the abrdn (Lothian) Pacific Basin Trust ("the fund")

## Continued

### Identifying and responding to risks of material misstatement due to non-compliance with laws and regulations

We identified areas of laws and regulations that could reasonably be expected to have a material effect on the financial statements from our general commercial and sector experience and through discussion with the Manager and the Administrator (as required by auditing standards) and discussed with the Directors the policies and procedures regarding compliance with laws and regulations.

The potential effect of these laws and regulations on the financial statements varies considerably.

Firstly, the fund is subject to laws and regulations that directly affect the financial statements including financial reporting legislation (including related authorised fund legislation maintained by the Financial Conduct Authority) and taxation legislation and we assessed the extent of compliance with these laws and regulations as part of our procedures on the related financial statement items.

Secondly, the fund is subject to many other laws and regulations where the consequences of non-compliance could have a material effect on amounts or disclosures in the financial statements, for instance through the imposition of fines or litigation. We identified the following areas as those most likely to have such an effect: money laundering, data protection and bribery and corruption legislation recognising the fund's activities. Auditing standards limit the required audit procedures to identify non-compliance with these laws and regulations to enquiry of the Directors and the Administrator and inspection of regulatory and legal correspondence, if any.

Therefore, if a breach of operational regulations is not disclosed to us or evident from relevant correspondence, an audit will not detect that breach.

### Context of the ability of the audit to detect fraud or breaches of law or regulation

Owing to the inherent limitations of an audit, there is an unavoidable risk that we may not have detected some material misstatements in the financial statements, even though we have properly planned and performed our audit in accordance with auditing standards. For example, the further removed non-compliance with laws and regulations is from the events and transactions reflected in the financial statements, the less likely the inherently limited procedures required by auditing standards would identify it.

In addition, as with any audit, there remained a higher risk of non-detection of fraud, as these may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal controls. Our audit procedures are designed to detect material misstatement. We are not responsible for preventing non-compliance or fraud and cannot be expected to detect non-compliance with all laws and regulations.

### Other information

The Manager is responsible for the other information presented in the Annual Report together with the financial statements. Our opinion on the financial statements does not cover the other information and, accordingly, we do not express an audit opinion or, except as explicitly stated below, any form of assurance conclusion thereon.

Our responsibility is to read the other information and, in doing so, consider whether, based on our financial statements audit work, the information therein is materially misstated or inconsistent with the financial statements or our audit knowledge. Based solely on that work:

- we have not identified material misstatements in the other information; and
- in our opinion the information given in the Manager's Report for the financial year is consistent with the financial statements.

### Matters on which we are required to report by exception

We have nothing to report in respect of the following matters where under the COLL Rules we are required to report to you if, in our opinion:

- proper accounting records for the fund have not been kept; or
- the financial statements are not in agreement with the accounting records.

### Manager's responsibilities

As explained more fully in its statement set out on page 5, the Manager is responsible for: the preparation of financial statements that give a true and fair view; such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error; assessing the fund's ability to continue as a going concern, disclosing, as applicable, matters related to going

# Independent Auditor's Report to the Unitholders of the abrdrn (Lothian) Pacific Basin Trust ("the fund")

## Continued

concern; and using the going concern basis of accounting unless they either intend to liquidate the fund or to cease operations, or have no realistic alternative but to do so.

### **Auditor's responsibilities**

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue our opinion in an auditor's report. Reasonable assurance is a high level of assurance, but does not guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the financial statements.

A fuller description of our responsibilities is provided on the FRC's website at [www.frc.org.uk/auditorsresponsibilities](http://www.frc.org.uk/auditorsresponsibilities).

### **The purpose of our audit work and to whom we owe our responsibilities**

This report is made solely to the fund's unitholders, as a body, in accordance with Rule 4.5.12 of the Collective Investment Schemes sourcebook ('the COLL Rules') issued by the Financial Conduct Authority under section 247 of the Financial Services and Markets Act 2000. Our audit work has been undertaken so that we might state to the fund's unitholders those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the fund and the fund's unitholders as a body, for our audit work, for this report, or for the opinions we have formed.

# Investment Report

## Investment Objective

To generate growth over the long term (5 years or more) by investing in Asian equities (company shares).

Performance Target: To achieve the return of the MSCI AC Asia Pacific ex Japan, plus 2% per annum over rolling three year periods (before charges). The Performance Target is the level of performance that the management team hopes to achieve for the fund. There is however no certainty or promise that they will achieve the Performance Target.

Performance Comparator: The Investment Association Asia Pacific ex Japan Equity Sector Average.

The Manager believes this is an appropriate target/ comparator for the fund based on the investment policy of the fund and the constituents of the index/sector.

## Investment Policy

### Portfolio Securities

- The fund will invest at least 70% in equities and equity related securities of companies listed, incorporated or domiciled in Asian countries, including Australasia, or companies that derive a significant proportion of their revenues or profits from Asian, including Australasia, operations or have a significant proportion of their assets there.
- The fund may also invest in other funds (including those managed by Aberdeen Investments), money-market instruments, and cash.

### Management Process

- The management team use their discretion (active management) to maintain a diverse asset mix at country, sector and stock level.
- Their primary focus is on stock selection using research techniques to select individual holdings. The research process is focused on identifying companies where the management team have a different view of a company's prospects to that of the market, and which align with their views regarding future economic and business conditions.
- In seeking to achieve the Performance Target, the MSCI AC Asia Pacific ex Japan is used as a reference point for portfolio construction and as a basis for setting risk constraints. The expected variation ("tracking error") between the returns of the fund and the index, is not ordinarily expected to exceed 6%. Due to the fund's risk constraints, the intention is that the fund's performance profile will not deviate significantly from that of the MSCI AC Asia Pacific ex Japan over the longer term.

## Derivatives and Techniques

- The fund may use derivatives to reduce risk, to reduce cost and/or generate additional income or growth consistent with the risk profile of the fund (often referred to as "Efficient Portfolio Management").
- Derivative usage in the fund is expected to be very limited. Where derivatives are used, this would mainly be in response to significant inflows into the fund so that in these instances, cash can be invested while maintaining the fund's existing allocations to company shares.

## Performance Review

Over the period under review, the Trust rose by 22.14% (Institutional Accumulation Shares, net of fees). This compares to an increase of 27.66% for its performance target, the MSCI AC Asia Pacific ex Japan + 2%.

Fund data source: ABOR; Basis: total return, published NAV to NAV, net of annual charges, UK net income reinvested, GBP. Benchmark data source: FactSet. Please note the Trust performance is quoted net of fees while the index return is quoted gross and contains no adjustment for fees.

Source: MSCI. The MSCI information may only be used for your internal use, may not be reproduced or disseminated in any form and may not be used as a basis for or a component of any financial instruments or products or indices. None of the MSCI information is intended to constitute investment advice or a recommendation to make (or refrain from making) any kind of investment decision and may not be relied on as such. Historical data and analysis should not be taken as an indication or guarantee of any future performance analysis, forecast or prediction. The MSCI information is provided on an "as is" basis and the user of this information assumes the entire risk of any use made of this information. MSCI, each of its affiliates and each other person involved in or related to compiling, computing or creating any MSCI information (collectively, the "MSCI Parties") expressly disclaims all warranties (including, without limitation, any warranties of originality, accuracy, completeness, timeliness, non-infringement, merchantability and fitness for a particular purpose) with respect to this information. Without limiting any of the foregoing, in no event shall any MSCI Party have any liability for any direct, indirect, special, incidental, punitive, consequential (including, without limitation, lost profits) any other damages. \*\*Aberdeen means the relevant member of Aberdeen Group, being Aberdeen plc together with its subsidiaries, subsidiary undertakings and associated companies (whether direct or indirect) from time to time.

Please remember that past performance is not a guide to future returns. The price of shares and the revenue from them may fall as well as rise. Investors may not get back the amount originally invested.

# Investment Report

## Continued

Companies selected for illustrative purposes only to demonstrate the investment management style described herein and not as an investment recommendation or indication of future performance.

The Trust rose during the period but underperformed its benchmark in NAV terms.

Following the extreme market volatility caused by domestic political turmoil in December 2024, South Korean stocks rebounded on optimism over growing political certainty and the new government's economic policies and market reform measures. More recently, we witnessed better-than-expected exports, particularly from the semiconductor sector, supported by strong pricing and sustained AI-driven demand. Our exposure to SK Hynix and Samsung Electronics benefited from structurally supportive supply-demand dynamics. Prices rose as supply lagged demand growth, underpinned by rising memory needs as AI adoption accelerated. The semiconductor uptrend also spilled over to Hyundai Electric, which saw robust order books, extended lead times, and improved pricing in its core power equipment business amid supportive supply-demand dynamics.

The tech-heavy Taiwanese market also rallied due to growth in AI hardware demand, with Chroma Ate emerging as the top contributor. Chroma supplies testing equipment to the semiconductor industry, whose demand is closely tied to the rise of AI. There were also positive contributions from AI-exposed names, such as ASE Technology and Accton Technology.

Meanwhile, Singapore Technologies Engineering released results that met with expectations, and overall sentiment was positive on the company's diversification across and within segments, propelling it to grow faster than the industry. Elsewhere, Hong Kong insurer AIA Group delivered a business update that surpassed market expectations, underpinned by solid value-of-new-business (VNB) growth and confident forward guidance. Management reaffirmed its ambition to outpace gross domestic product growth across all operating regions.

In China, the DeepSeek announcement drove a sharp increase in AI-related stocks. As a result, the Trust's underweight exposure to Alibaba significantly detracted from performance, given that its share price spiked by more than 50% in the first quarter of 2025. To place our Alibaba positioning in context, we exited Alibaba in late 2024 despite its low valuations due to growing concerns about its struggling e-commerce business, which was losing market share to rivals such as PDD. Alibaba subsequently showed signs of turning around this e-commerce segment. As a result, we re-initiated our position in the company in March 2025. The AI theme also buoyed Tencent, a core holding, which has the

second-largest cloud business in the country, behind Alibaba. Among our technology hardware supply chain holdings in Taiwan, Delta Electronics was also affected by the sell-off.

Stock selection in Australia also detracted. Notably, Aristocrat Leisure fell on concerns that higher design and development spending would weigh on its financial year 2026 margins despite solid financial year 2025 results.

An overweight position in India impacted performance. Several of the holdings underperformed, including HDFC Bank, whose third-quarter results for the financial year 2026 exceeded expectations on the bottom line, thanks to improving net interest margins, resilient fee income, and stable asset quality. However, the company disappointed by reporting a still-elevated Loan Deposit Ratio (LDR), with the fear that this could constrain its growth going forward.

Elsewhere, Indonesia's Bank Mandiri declined amid sentiment surrounding the country's banks, weighed down by the Israel-Iran conflict and concerns about the potential impact on oil prices and, consequently, the Indonesian economy. Monthly May 2025 bank-only results across the state-owned banks also pointed to slow growth and continued net interest margin pressure amid a tight liquidity environment.

## Market Review

Asian equities proved resilient over the 12 months under review, delivering strong gains. The period began on an uncertain note, with persistent concerns about tariff risks, the direction of the US economy, and the US Federal Reserve's policy. The volatility was most extreme in February, when the launch of a low-cost Chinese artificial intelligence (AI) model, DeepSeek, took the world by surprise and led to market swings as investors scrambled to adjust expectations around AI, data centre capital expenditure and technology hardware demand.

Thereafter, most markets recovered as the US appeared to be making progress on trade deals with several countries, including China. Support also came from robust returns in the technology sector. South Korea, in particular, was lifted by ongoing supply-demand tightness in memory. The Taiwan market also made solid gains on the artificial AI-led tech rally thematic.

On the other hand, Indian stocks declined. Initially, this was led by profit-taking after a return of buying interest in March. However, more recently, continued foreign outflows, rising crude oil prices and a weak rupee proved unhelpful. At the time of writing, India and the US reached a long-awaited trade agreement, which should bring clarity and investor optimism going forward. Lastly, Indonesian equities also sold off amid regulatory and governance concerns surrounding the stock market.

# Investment Report

## Continued

### Portfolio Activity and Review

We continued to refine our positioning, focusing on earnings visibility and cash flow generation as key points.

Recent additions to the portfolio included ANZ Group. This Australian diversified property developer holds an investment portfolio of income-yielding Australian assets and a fund management business that manages third-party assets under management (AUM). We also bought Medibank, the leading private health insurer in Australia, with a market share of about 25% and industry-leading margins.

In China, we added Fuyao Glass, the country's leading auto glass manufacturer, holding over 60% domestic market share and expanding globally. The company's earnings visibility remains strong, driven by higher volumes and product mix upgrades in both China and the US.

Elsewhere, we bought South Korea's Hyundai Rotem, the country's leading defence and rail solutions manufacturer, with its defence business now driving the bulk of its revenue. Its order growth remains solid, driven by industry tailwinds of geopolitical tensions and global conflicts, renewed European spending on arms, and restocking in the Middle East.

Conversely, sales included Singapore Technologies Engineering in favour of a new position in Hyundai Rotem, and divested CSL to fund the initiation of Medibank. We also sold Delta Electronics to more appealing opportunities elsewhere.

### Portfolio Outlook and Strategy

Considering the ongoing uncertainty, we remain vigilant in identifying opportunities across Asian equity markets. We continue to assess the implications of evolving tariff dynamics and potential shifts in monetary policy, while carefully managing growth exposures within our regional portfolios. Looking forward, Asian corporates remain fundamentally sound, supported by low leverage, strong competitive positioning, and a broadly favourable macroeconomic environment with limited inflationary pressures.

While challenges persist, the companies we hold are led by dynamic management teams, possess robust financials, and operate with high barriers to entry and globally competitive business models. These attributes have enabled them to navigate past shocks effectively, and we remain optimistic about their long-term growth prospects. We continue to believe that high-quality companies are best placed to demonstrate resilience, particularly in the face of heightened volatility and macroeconomic uncertainty.

### Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the fund. The table below shows the fund's ranking on the Risk and Reward Indicator. The risk and reward indicator changed from 6 to 5 on 9 September 2025.

Typically lower rewards, lower risk				Typically higher rewards, higher risk		
←				→		
1	2	3	4	5	6	7

Risk and reward indicator table as at 31 January 2026.

The fund is rated as 5 because of the extent to which the following risk factors apply:

- Equity Risk - The fund invests in equity and equity related securities. These are sensitive to variations in the stock markets which can be volatile and change substantially in short periods of time.
- Emerging Markets Risk - The fund may invest in emerging markets, where political, economic, legal and regulatory systems are less developed. As a result, investing in emerging markets may involve higher volatility and a greater risk of loss than investing in developed markets. In particular, where the fund invests in Variable Interest Entity (VIE) structures to gain exposure to industries with foreign ownership restrictions or invests in Chinese assets via Stock Connect / Bond Connect, there are additional operational risks, which are outlined in the prospectus.
- Derivatives Risk - The use of derivatives may involve additional liquidity, credit and counterparty risks. In some cases the risk of loss from derivatives may be increased where a small change in the value of the underlying investment may have a larger impact on the value of the derivative.

All investment involves risk. This fund offers no guarantee against loss or that the fund's objective will be attained.

The price of assets and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment.

Inflation reduces the buying power of your investment and income.

The value of assets held in the fund may rise and fall as a result of exchange rate fluctuations.

The fund could lose money if an entity (counterparty) with which it does business becomes unwilling or unable to honour its obligations to the fund.

In extreme market conditions some securities may become hard to value or sell at a desired price. This could affect the fund's ability to meet redemptions in a timely manner.

The fund could lose money as the result of a failure or delay in operational processes and systems including but not limited to third party providers failing or going into administration.

# Comparative Table

<b>Institutional Accumulation</b>	<b>2026</b> pence per unit	<b>2025</b> pence per unit	<b>2024</b> pence per unit
<b>Change in net assets per unit</b>

Lowest unit price	164.8	171.0	166.8

The closing net asset value (£'000) divided by the closing number of units may not calculate to the closing net asset value per unit (p) due to rounding differences. The published closing net asset value per unit (p) is based on unrounded values and represents the actual price.

The return after charges figures are based on the accounting NAV, as the financial statements are produced at a valuation point that is different from the published daily NAV.

Operating charges are expenses associated with the maintenance and administration of the fund on a day to day basis that are actually borne by the unit class.

Highest and Lowest prices are based on official published daily NAVs.

# Notes to the Financial Statements

For the year ended 31 January 2026

## 1 Accounting Policies

### (a) Basis of preparation

The financial statements have been prepared on a historical cost basis, as modified by the revaluation of investments, and in accordance with the Statement of Recommended Practice (SORP) for Financial Statements of Authorised Funds issued by the Investment Association in May 2014 (IMA SORP 2014) and FRS 102 The Financial Reporting Standard applicable in the UK and Republic of Ireland.

The Manager has undertaken a detailed assessment, and continues to monitor, the fund's ability to meet its liabilities as they fall due, including liquidity, declines in global capital markets and investor redemption levels. Based on this assessment, the fund continues to be open for at least the next 12 months after the financial statements are signed and the Manager is satisfied the fund has adequate financial resources to continue in operation and accordingly it is appropriate to adopt the going concern basis in preparing the financial statements.

### (b) Valuation of investments

Investments have been valued at fair value as at the close of business on 31 January 2026. The SORP defines fair value as the market value of each security, in an active market, this is generally the quoted bid price.

Unlisted, unapproved, illiquid or suspended securities are valued at the Manager's best estimate of the amount that would be received from an immediate transfer at arm's length. The Manager has appointed a Fair Value Pricing committee to review valuations.

Collective Investment Schemes are valued by reference to their net asset value. Dual priced funds have been valued at the bid price. Single priced funds have been valued using the single price.

Any open positions in derivative contracts or forward foreign currency transactions at the year-end are included in the Balance Sheet at their mark to market value.

### (c) Foreign Exchange

Assets and liabilities denominated in foreign currencies are translated into Sterling at the prevailing exchange rates as at the close of business on the reporting date.

Foreign currency transactions are translated at the rates of exchange ruling on the date of such transactions. Exchange differences on such transactions follow the same treatment as the principal amounts.

### (d) Dilution

In certain circumstances (as detailed in the Prospectus) the Manager may apply a dilution adjustment on the issue or cancellation of units, which is applied to the capital of the fund on an accruals basis. The adjustment is intended to protect existing investors from the costs of buying or selling underlying investments as a result of large inflows or outflows from the fund.

### (e) Revenue

Overseas dividends are grossed up at the appropriate rate of withholding tax and the tax consequences are shown within the tax charge.

Revenue from collective investment schemes is recognised when the investments are quoted ex dividend.

Accumulation distributions from shares held in collective investment schemes are reflected as revenue and form part of the distribution.

Equalisation received from distributions or accumulations on units or shares in underlying investments is treated as capital and deducted from the cost of the investment.

Revenue from offshore funds is recognised when income is reported by the offshore fund operator.

Interest on bank deposits is recognised on an accruals basis.

Interest from short-term deposits is recognised on an accruals basis.

# Notes to the Financial Statements

## Continued

Stock dividends are recognised as revenue when they are quoted ex dividend. In the case of enhanced stock dividends, the value of the enhancement is recognised as capital.

Special dividends may be treated as repayments of capital or as revenue dependent on the facts of the particular case. Where receipt of a special dividend results in a significant reduction in the capital value of the holding, then the special dividend will be recognised as capital so as to ensure that the matching principle is applied to gains and losses. Otherwise, the special dividends are recognised as revenue.

Underwriting commission is taken to revenue and recognised when the issue takes place, except where the fund is required to take up all or some of the shares underwritten in which case an appropriate proportion of the commission received is deducted from the cost of the relevant shares.

### (f) Expenses

All expenses other than those relating to the purchase and sale of investments are charged against revenue on an accruals basis in the Statement of total return.

Expenses relating to the purchases of investments are charged to the cost of investment and expenses relating to the sales of investments are deducted from the proceeds on sales.

### (g) Taxation

Provision is made for corporation tax at the current rate on the excess of taxable income over allowable expenses.

UK dividends are disclosed net of any related tax credit.

Overseas dividends are disclosed gross of any foreign tax suffered and the tax element is separately disclosed in the taxation note.

The tax accounting treatment follows that of the principal amount, with charges or reliefs allocated using the marginal basis regardless of any alternative treatment that may be permitted in determining the distribution.

Any windfall overseas tax reclaims received are netted off against irrecoverable overseas tax and therefore the irrecoverable overseas tax line in the taxation note may be negative.

The fund abrdn (Lothian) Pacific Basin Trust is party to certain claims and proceedings to recover tax suffered in respect of overseas income. These claims and proceedings are considered to be contingent assets of the fund and have not been recognised in these Financial Statements as the outcome of the claims and the potential recoveries are not sufficiently certain.

Deferred taxation is provided on all timing differences that have originated but not reversed by the balance sheet date other than those differences regarded as permanent. Any liability to deferred tax is provided at the average rate of tax expected to apply. Deferred tax assets and liabilities are not discounted to reflect the time value of money.

Deferred tax assets are only recognised to the extent that it is regarded more likely than not that there will be taxable profits against which the reversal of underlying timing differences can be offset.

### (h) Distributions

All of the net revenue available for distribution at the year end will be distributed. Where a fund has accumulation unitholders, this will be reinvested.

Gains and losses on non-derivative investments and currencies, whether realised or unrealised, are taken to capital and are not available for distribution.

### (i) Equalisation

Equalisation appears within the fund reports as part of the distribution. This represents the net revenue in the fund's unit price attached to the issue and cancellation of units. It will form part of any distributions at the period end attributable to unitholders.

# Notes to the Financial Statements

## Continued

### 2 Risk management policies

Generic risks that the Aberdeen range are exposed to and the risk management techniques employed are disclosed below. Numerical disclosures and specific risks, where relevant, are disclosed within the financial statements.

The Financial Conduct Authority (FCA) Collective Investment Schemes Sourcebook (COLL) and FCA Funds Sourcebook (FUND) rules require the Management Company to establish, implement and maintain an adequate and documented Risk Management Process (RMP) for identifying the risks they manage, or might be, exposed to. The RMP must comprise of such procedures as are necessary to enable Aberdeen to assess the exposure of each fund it manages to market risk, liquidity risk, counterparty risk, operational risk and all other risks that might be material.

Aberdeen functionally and hierarchically separates the functions of risk management from the operating units and portfolio management functions, to ensure independence and avoid any potential or actual conflicts of interest. The risk management function has the necessary authority, access to all relevant information, staff and regular contact with senior management and the Board of Directors of the Company. The management of investment risk within Aberdeen is organised across distinct functions, aligned to the well-established 'three lines of defence' model.

1. Risk ownership, management and control.
2. Oversight of risk, compliance and conduct frameworks.
3. Independent assurance, challenge and advice.

The risk management process involves monitoring funds on a regular and systematic basis to identify, measure and monitor risk and where necessary escalate appropriately, including to the relevant Board, any concerns and proposed mitigating actions.

The risk team, in line with client expectations and the investment process, develops the risk profiles for the funds in order to set appropriate risk limits. Regulatory limits as well as those agreed, are strictly enforced to ensure that Aberdeen does not inadvertently (or deliberately) breach them and add additional risk exposure. In addition, there is an early warnings system of potential changes in the portfolio risk monitoring triggers. Where possible, these are coded into the front office dealing system, in a pre-trade capacity, preventing exposures or breaching limits before the trade is actually executed.

#### Risk Definitions & Risk Management Processes

i) **Market Risk** is the risk that economic, market or idiosyncratic events cause a change in the market value of Client assets. Market Risk can be broadly separated into two types:

- (1) Systematic risk stems from any factor that causes a change in the valuation of groups of assets. These factors may emerge from a number of sources, including but not limited to economic conditions, political events or actions, the actions of central banks or policy makers, industry events or, indeed, investor behaviour and risk appetite.
- (2) Specific or Idiosyncratic Risk, which is the part of risk directly associated with a particular asset, outside the realms of, and not captured by Systematic Risk. In other words, it is the component of risk that is peculiar to a specific asset, and may manifest itself in various guises, for example: corporate actions, fraud or bankruptcy.

Portfolios are subject to many sub-categories of market risk. Many of these risks are interlinked and not mutually exclusive. Examples of these types of investment risk include: Country risk; Sector risk; Asset-class risk; Inflation/deflation risk; Interest rate risk; Currency risk; Derivatives risk; Concentration risk; and Default risk. Factors that cause changes in market risks include: future perceived prospects (i.e. changes in perception regarding the future economic position of countries, companies, sectors, etc.); shifts in demand and supply of products and services; political turmoil, changes in interest rate/inflation/taxation policies; major natural disasters; recessions; and terrorist attacks.

# Notes to the Financial Statements

## Continued

There are several ways in which to review and measure investment risk. The risk team recognises that each method is different and has its own unique insights and limits, and applies the following measurements for each fund, where relevant:

- **Leverage:** has the effect of gearing a fund's expected performance by allowing it to gain greater exposure to underlying investment opportunities (gains and losses). The higher the leverage the greater the risk (potential loss).
- **Value-at-Risk (VaR) and Conditional VaR (CVaR):** VaR measures with a degree of confidence the maximum the fund could expect to lose in any given time frame. Assuming a normal (Gaussian) distribution, this is a function of the volatility of the fund's returns. The higher the volatility, the higher the VaR, the greater the risk. CVaR calculates the expected tail loss, under the assumption that the VaR has been reached.
- **Volatility, Tracking Error (TE):** Volatility measures the size of variation in returns that a fund is likely to expect. The higher the volatility the higher the risk. TE measures the expected magnitude of divergence of returns between the fund and benchmark over a given time.
- **Risk Decomposition:** Volatility, tracking error and VaR may be broken down to show contribution from market related factors ("Systematic" Risk) and instrument specific (Idiosyncratic Risk). This is not a different measure as such, but is intended to highlight the sources of volatility and VaR.
- **Concentration Risk:** By grouping the portfolio into various different exposures (e.g. country, sector, issuer, asset, etc.), we are able to see where, if any, concentration risk exists.
- **Stress Tests and Scenario Analysis:** This captures how much the current portfolio will make or lose if certain market conditions occur.
- **Back Testing:** This process helps to assess the adequacy of the VaR model and is carried out in line with UCITS regulatory requirements (FCA COLL 6.12). Excessive levels of overshoots and the reasons behind them are reported to the Board.

To generate these risk analytics the risk team relies on third party calculation engines, such as RiskMetrics, Axioma and Bloomberg PORT+. Once the data has been processed, it is analysed by the risk team, generally reviewing absolute and relative risks, change on month and internal peer analysis. Any issues or concerns that are raised through the analysis prompt further investigation and escalation if required. Breaches of hard limits are also escalated immediately. All client mandated and regulatory risk limits are monitored on a daily basis.

Stress tests are intended to highlight those areas in which a portfolio would be exposed to risk if the current economic conditions were likely to change. An economic event may be a simple change in the direction of interest rates or return expectations, or may take the form of a more extreme market event such as one caused through military conflict. The stress test itself is intended to highlight any weakness in the current portfolio construction that might deliver unnecessary systematic exposure if the market were to move abruptly.

Stress testing is performed on a regular basis using relevant historical and hypothetical scenarios.

- ii) **Liquidity risk** is defined as the risk that a portfolio may need to raise cash or reduce derivative positions on a timely basis either in reaction to market events or to meet client redemption requests and may be obliged to sell long term assets at a price lower than their market value. Liquidity is also an important consideration in the management of portfolios: Portfolio Managers need to pay attention to market liquidity when sizing, entering and exiting trading positions.

Measuring liquidity risk is subject to three main dimensions:

- Asset Liquidity Risk – how quickly can assets be sold.
- Liability Risk – managing redemptions as well as all other obligations arising from the liabilities side of the balance sheet.
- Contingency Arrangements or Liquidity Buffers – utilising credit facilities etc.

# Notes to the Financial Statements

## Continued

### Liquidity Risk Management Framework

Aberdeen has a liquidity risk management framework in place applicable to the funds and set out in accordance with its overall Risk Management Process, relative to the size, scope and complexity of the funds. Liquidity assessment and liquidity stress testing is typically performed monthly, monitoring both the asset and liability sides. Asset side stressed scenarios are considered based on the nature of different asset classes and their liquidity risks to demonstrate the effects of a market stress on the ability to sell-down a fund. Liability side analysis includes stress scenarios on the investor profile as well as liabilities on the balance sheet. Any particular concerns noted or liquidity risk limit breaches are escalated to the relevant Committees and Boards, if material.

- iii) **Counterparty credit risk** is the risk of loss resulting from the fact that the counterparty to a transaction may default on its obligations prior to the final settlement of the transaction's cash flow. Credit risk falls into both market risk and specific risk categories. Credit risk is the risk that an underlying issuer may be unable (or unwilling) to make a payment or to fulfil their contractual obligations. This may materialise as an actual default or, to a lesser extent, by a weakening in a counterparty's credit quality. The actual default will result in an immediate loss whereas, the lower credit quality will more likely lead to mark-to-market adjustment.

Transactions involving derivatives are only entered into with counterparties having an appropriate internal credit rating that has been validated by the credit research team and approved by the relevant credit committee. Appropriate counterparty exposure limits will be set and agreed by these committees and the existing credit exposures will be assessed against these limits.

### iv) Operational Risk

Operational risk can be defined as the risk of loss resulting from inadequate or failed internal processes, people and systems or from external events. Operational risk also includes the breakdown of processes to comply with laws, regulations or directives.

### Operational Risk Management

An Operational Risk Management Framework is in place to identify, manage and monitor appropriate operational risks, including professional liability risks, to which the Management Company and the Funds are or could be reasonably exposed. The operational risk management activities are performed independently as part of one of the functions of the Risk Division.

Aberdeen Group plc (the "Group") Risk Management Framework is based upon the Basel II definition of operational risk which is "the risk of loss resulting from inadequate or failed internal processes, people and systems or from external events".

The Group's management of operational risk is therefore aimed at identifying risks in existing processes and improving existing controls to reduce their likelihood of failure and the impact of losses. The Group has developed a framework that embodies continuous improvement to internal controls and ensures that the management of risk is embedded in the culture of the Group.

The identification, management, monitoring and resolution of events, risks and controls are facilitated via the Group's risk management system, Shield. The system is designed to facilitate the convergence of governance, risk and compliance programmes and automate a comprehensive review and assessment of operational risks.

### 5 Expenses

	2026 £'000	2025 £'000
<b>Payable to the Manager, associates of the Manager and agents of either of them:</b>		
Manager's periodic charge	11,806	12,131
Registration fees	1,259	1,294
	13,065	13,425
<b>Payable to the Trustee or associates of the Trustee, and agents of either of them:</b>		
Safe custody fee	308	360
Trustee fees	56	113
	364	473
<b>Other:</b>		
Audit fee	18	9
Professional fees	5	9
	23	18
<b>Total expenses</b>	<b>13,452</b>	<b>13,916</b>

Irrecoverable VAT is included in the above expenses, where applicable.  
The audit fee for the year, including VAT, was £14,340 (2025: £13,860).

### 6 Taxation

	2026 £'000	2025 £'000
<b>(a) Analysis of charge in year</b>		
Overseas taxes	3,032	2,390
Overseas capital gains tax	3,701	7,014
Total current tax	6,733	9,404
Deferred tax (note 6c)	(2,957)	(4,212)
<b>Total taxation (note 6b)</b>	<b>3,776</b>	<b>5,192</b>

# Notes to the Financial Statements

## Continued

	2026 £'000	2025 £'000
<b>(b) Factors affecting total tax charge for the year</b>		
The tax assessed for the year is less than (2025: greater than) the standard rate of corporation tax in the UK for authorised unit trusts (20%). The differences are explained below:		
<b>Net revenue before taxation</b>	<b>20,918</b>	<b>22,484</b>
Corporation tax at 20% (2025: 20%)	4,184	4,497
Effects of:		
Revenue not subject to taxation	(6,655)	(6,877)
Overseas taxes	3,032	2,390
Overseas tax expensed	(10)	(17)
Excess allowable expenses	2,481	2,397
Overseas capital gains tax	3,701	7,014
Deferred tax	(2,957)	(4,212)
<b>Total tax charge for year (note 6a)</b>	<b>3,776</b>	<b>5,192</b>

Authorised unit trusts are exempt from tax on capital gains in the UK. Therefore, any capital gain is not included in the above reconciliation.

### (c) Deferred tax

Deferred tax charge at the start of the year	6,816	11,028
Deferred tax charge in statement of total return for year (note 6a)	(2,957)	(4,212)
<b>Provision at the end of the year</b>	<b>3,859</b>	<b>6,816</b>

### (d) Factors that may affect future tax charge

At the year end, after offset against revenue taxable on receipt, there is a potential deferred tax asset of £41,958,000 (2025: £39,477,000) due to surplus expenses. It is unlikely that the fund will generate sufficient taxable profits to utilise these amounts and therefore no deferred tax asset has been recognised in the current or prior year.

## 7 Distributions (including the movement between net revenue and distributions)

	2026 £'000	2025 £'000
Distribution	16,650	19,641
Add: Income deducted on cancellation of units	2,165	667
Deduct: Income received on issue of units	(58)	(214)
<b>Total distributions for the year</b>	<b>18,757</b>	<b>20,094</b>

# Notes to the Financial Statements

## Continued

	2026 £'000	2025 £'000
<b>Movement between net revenue and distributions</b>		
Net revenue after taxation	17,142	17,292
Overseas capital gains tax on realised gains	3,701	7,014
Overseas deferred capital gains tax on unrealised gains	(2,957)	(4,212)
Transfer of capital to income	870	-
Undistributed revenue brought forward	1	1
Undistributed revenue carried forward	-	(1)
<b>Total distributions for the year</b>	<b>18,757</b>	<b>20,094</b>

Details of the distribution per unit are set out in this fund's distribution table.

## 8 Debtors

	2026 £'000	2025 £'000
Accrued revenue	1,072	1,606
Overseas withholding tax recoverable	1,214	1,675
Sales awaiting settlement	-	1,451
<b>Total debtors</b>	<b>2,286</b>	<b>4,732</b>

## 9 Liquidity

	2026 £'000	2025 £'000
<b>Cash and bank balances</b>		
Cash at bank	4,775	8,176
Deposits with original maturity of less than 3 months	33,209	3,230
	<b>37,984</b>	<b>11,406</b>
<b>Net liquidity</b>	<b>37,984</b>	<b>11,406</b>

## 10 Provisions for Liabilities

	2026 £'000	2025 £'000
The provisions for liabilities comprise:		
Overseas capital gains tax	3,859	6,816
<b>Total provisions for liabilities</b>	<b>3,859</b>	<b>6,816</b>

### 11 Creditors

	2026 £'000	2025 £'000
Accrued expenses payable to the Manager	1,181	1,152
Accrued expenses payable to the Trustee or associates of the Trustee	64	106
Amounts payable to the Manager for cancellation of units	1,560	-
Capital gains tax payable	784	363
Other accrued expenses	14	8
Purchases awaiting settlement	190	1,432
<b>Total creditors</b>	<b>3,793</b>	<b>3,061</b>

### 12 Related Party Transactions

abrdrn Fund Managers Limited, as Authorised Fund Manager, is a related party and acts as principal in respect of all transactions of units in the fund.

The aggregate monies received through issue and paid on cancellation of units are disclosed in the statement of change in unitholders' funds.

Any amounts due from or due to abrdrn Fund Managers Limited at the end of the accounting year are disclosed in notes 8 and 11.

Amounts payable to abrdrn Fund Managers Limited, in respect of expenses are disclosed in note 5 and any amounts due at the year end in note 11.

### 13 Portfolio Transaction Costs

	Purchases		Sales	
	2026 £'000	2025 £'000	2026 £'000	2025 £'000
<b>Trades in the year</b>

Taxes			0.12	0.08

At the balance sheet date the average portfolio dealing spread (i.e. the spread between bid and offer prices expressed as a percentage of the offer price) was 0.27% (2025: 0.24%), this is representative of the average spread on the assets held during the year.

## 14 Units in Issue Reconciliation

	Opening units 2025	Creations during the year	Cancellations during the year	Closing units 2026
Institutional Accumulation	843,135,869	2,867,006	(132,225,614)	713,777,261

## 15 Fair Value Hierarchy

The three levels of the fair value hierarchy under FRS 102 are described below:

Level 1: Unadjusted quoted market prices in active markets that are accessible at the measurement date for the identical unrestricted assets or liabilities.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices).

Level 3: Inputs for asset or liability that are not based on observable market data (unobservable inputs).

Fair value of investment assets	2026 £'000	2026 £'000	2026 £'000	2025 £'000	2025 £'000	2025 £'000

### 16 Risk Management Policies and Disclosures

The risks inherent in the fund's investment portfolio are as follows:

#### Foreign currency risk

Fluctuations in the foreign exchange rates can adversely affect the value of a portfolio. The following table details the net exposure to the principal foreign currencies that the fund is exposed to including any instruments used to hedge against foreign currencies, if applicable.

Currency	Net foreign currency exposure	Net foreign currency exposure
	2026 £'000	2025 £'000
Australian Dollar	226,709	228,208
China Renminbi	70,060	108,952
Hong Kong Dollar	406,641	359,626
Indian Rupee	238,907	304,741
Indonesian Rupiah	15,895	34,113
Malaysian Ringgit	18,459	25,144
Philippines Peso	-	7,824
Singapore Dollar	36,497	37,246
South Korean Won	287,379	184,793
Taiwan Dollar	324,724	316,621
Thai Baht	12,248	11,692
US Dollar	9,629	21,940
<b>Total</b>	<b>1,647,148</b>	<b>1,640,900</b>

At 31 January 2026, if the value of Sterling increased or decreased by 5% against all other currencies, with all other variables remaining constant, then the change in net assets attributable to unitholders from investment activities will increase or decrease by approximately £82,357,000 (2025: £82,045,000).

#### Interest rate risk

The majority of the fund's financial assets are in non-interest bearing assets. Therefore, the fund's exposure to interest rate risk is considered insignificant. This is consistent with the exposure during the prior year.

#### Other price risk

The fund's investment portfolio is exposed to market price fluctuations which are monitored by the Investment Adviser in pursuance of the investment objectives and policies. Adherence to investment guidelines and to investment and borrowing powers mitigate the risk of excessive exposure to any particular type of security or issuer.

An increase or decrease in market values will therefore have a direct effect on the value of the investment assets in the portfolio and therefore a proportionate effect on the value of the fund.

As at 31 January 2026, if the prices of investments held by the fund increased or decreased by 5%, with all other variables remaining constant, then net assets attributable to the unitholders would increase or decrease by approximately £82,392,000 (2025: £82,137,000).

#### Financial derivatives instrument risk

The fund had no exposure to derivatives as at 31 January 2026 (2025: £Nil).

#### Liquidity risk

All of the fund's financial liabilities are payable on demand or in less than one year, 2026 £7,652,000 (2025: £9,877,000).

# Distribution Table

For the year ended 31 January 2026 (in pence per unit)

## Final dividend distribution

Group 1 – units purchased prior to 1 February 2025

Group 2 – units purchased between 1 February 2025 and 31 January 2026

	Revenue	Equalisation	Distribution paid 31/03/26	Distribution paid 31/03/25
<b>Institutional Accumulation</b>				
Group 1	2.3326	-	2.3326	2.3295
Group 2	0.3941	1.9385	2.3326	2.3295

## Equalisation

This applies only to units purchased during the distribution period (group 2 units). It is the average amount of revenue included in the purchase price of group 2 units and is refunded to the holders of these units as a return of capital. Being capital it is not liable to income tax but must be deducted from the cost of units for capital gains tax purposes.

# Remuneration (unaudited)

## Remuneration Policy

The Aberdeen Group plc Remuneration Policy (the "**Policy**") applies with effect from 1 January 2025. The purpose of the Policy is to document clearly the remuneration policies, practices and procedures of Aberdeen as approved by the Aberdeen Group plc Remuneration Committee (the "**Committee**"). The Policy is available on request.

The Policy applies to employees of the Aberdeen group of companies ("**Group**" or "**Aberdeen**"), including UCITS V Management Companies ("**ManCos**") and the UCITS V funds that the ManCo manages.

## Remuneration Principles

Aberdeen applies Group wide principles for remuneration policies, procedures and practices ensuring that:

- Remuneration within the Group is simple, transparent and fair.
- Our Policy supports our long-term strategy by reinforcing a performance-driven culture. It aligns the interests of our employees, shareholders and, importantly, our clients / customers.
- Our remuneration structure is flexible to accommodate the different challenges and priorities across all businesses and functions as appropriate.
- Remuneration policies, procedures and practices promote good conduct, including sound and effective risk management and do not encourage risk taking that exceeds the level of tolerated risk appetite.
- Remuneration extends beyond the provision of fixed and variable pay, with a focus on the retirement provision and the wellbeing needs of our employees, as part of our remuneration philosophy.
- Total remuneration delivered is affordable for the Group.

## Remuneration Framework

Employee remuneration is composed of fixed and variable elements of reward as follows:

- a) Fixed remuneration (salary and cash allowances, where appropriate; and benefits, including pension).
- b) Variable remuneration (bonus, a proportion of which may be subject to retention or deferral depending on role and regulatory requirements; senior employees may also be awarded a long-term incentive award).

Appropriate ratios of fixed: variable remuneration will be set to as to ensure that:

- a) Fixed and variable components of total remuneration are appropriately balanced; and
- b) The fixed component is a sufficiently high proportion of total remuneration to allow Aberdeen to operate a fully flexible policy on variable remuneration components, including having the ability to award no variable remuneration component in certain circumstances where either individual and / or Group performance does not support such an award.

# Remuneration (unaudited)

## Continued

<b>Base salary</b>	Base salary provides a core reward for undertaking the role and depending on the role, geographical or business market variances or other indicators, additional fixed cash allowances may make up a portion of fixed remuneration. Periodic reviews take into account the employee's role, scope of responsibilities, skills and experience, salary benchmarks (where available) and, where relevant, any local legislative or regulatory requirements.
<b>Benefits (including retirement benefit where appropriate)</b>	<p>Benefits are made up of core benefits which are provided to all employees; and extra voluntary benefits that may be chosen by certain employees which may require contribution through salary sacrifice or other arrangements.</p> <p>Any discretionary pension benefits awarded to Material Risk Takers ("MRTs") shall be made in non-cash instruments. In the context of a retirement, the discretionary pension benefits vested to the staff member shall be subject to a five-year retention period. Where a staff member leaves the organisation before retirement, the discretionary pension benefits shall not be vested before a period of five years and will be subject to performance assessment and ex-post risk adjustment before pay-out.</p>
<b>Annual Performance Bonus Awards</b>	<p>Employees who have been employed during a performance year (1 January to 31 December) may be eligible to be considered for an annual bonus in respect of that year.</p> <p>Annual bonuses are based upon Group, Business, Function, Team and Individual performance (with individual performance assessed against agreed goals and behaviours). The variable remuneration pool for all eligible employees, including Identified Staff or MRTs, is determined initially by reference to profitability and other quantitative and qualitative financial and non-financial factors, incorporating consideration of all risk categories, including sustainability risks* (on an ex-post and ex-ante basis). In reaching its final funding decision, the Committee exercises its judgement to ensure that the outcome reflects holistic Company performance considerations.</p> <p>abrdr Fund Managers Limited has specific obligations to act in the best interests of the UCITS V funds it manages and its investors. Accordingly, the performance of the underlying funds and the interests of investors (including, where relevant, investment risk) are also taken into account as appropriate. The Audit and Risk Committee formally advise the Committee as part of this process.</p> <p>The overall bonus pool is allocated to businesses and functions based on absolute and relative performance of each business and function and their alignment with strategic priorities and risk considerations. Allocation by region and subdivision / team is determined on a discretionary basis by the business / function and regional heads based on the absolute and relative performance of the constituent teams and alignment with strategic priorities.</p> <p>Individual annual bonus awards are determined at the end of the 12-month performance period with performance assessed against financial and non-financial individual objectives, including behaviour and conduct. Individual awards for Identified Staff are reviewed and approved by the Committee (with some individual award approvals delegated, as appropriate, to the Group's Compensation Committee, over which the Committee retains oversight). In carrying out these approvals, the Committee seeks to ensure that outcomes are fair in the context of overall Group performance measures and adjusted, where appropriate, to reflect input from the Audit and Risk Committee.</p> <p>Variable remuneration awards are subject to deferral for a period of up to three years. A retention period may also be applied as required by the relevant regulatory requirements. Deferral rates and periods comply, at a minimum, with regulatory requirements. In addition to the application of ex-ante adjustments described above, variable remuneration is subject to ex-post adjustment (malus / clawback arrangements) for all employees.</p>
<b>Other elements of remuneration – selected employees</b>	<p>The following remuneration arrangements may be awarded in certain very limited circumstances:</p> <p><b>Carried Interest Plans</b> – These arrangements are designed to reward performance in roles where a carried interest plan is appropriate. Selected employees are granted carried interest shares in appropriate funds established by the Group.</p> <p><b>Buy-Out Awards / Guaranteed Bonuses</b> – These are intended to facilitate / support the recruitment of new employees. Buy-outs are not awarded, paid or provided unless they are in the context of hiring new employees. Guaranteed bonuses are not awarded, paid or provided unless they are exceptional and in the context of hiring new employees and limited to the first year of service. These awards are only made where such a payment or award is permitted under any relevant remuneration regulations and are designed to compensate for actual or expected remuneration foregone from previous employers by virtue of their recruitment.</p> <p><b>Retention and Performance Awards / LTIP</b> – Supports retention and / or the delivery of specific performance outcomes and / or to incentivise senior employees to support the long-term, sustained performance of Aberdeen. The Company may determine that it is appropriate to grant such awards in limited circumstances. Awards are structured to deliver specific retention and / or performance outcomes. Retention and / or performance awards comply with all relevant regulatory requirements.</p> <p><b>Severance Pay</b> – Payment made to support an employee whose role is considered to be redundant. Severance payments comply with any legislative and regulatory requirements and any payments are inclusive of any statutory entitlement. In the event of severance, the treatment of any individual elements of an employee's remuneration is governed, as appropriate, by relevant plan or scheme rules.</p>

\*According to SFDR, sustainability risk means an environmental, social or governance event or condition that, if it occurs, could cause an actual or a potential material negative impact on the value of the investment.

# Remuneration (unaudited)

## Continued

### Control Functions

The Group ensures that, as appropriate, senior employees engaged in a control function are independent from the business units they oversee and have appropriate authority to undertake their roles and duties. These include, but are not necessarily limited to, Risk, Compliance and Internal Audit function roles. Senior employees engaged in a control function are remunerated in a way that ensures they are independent from the business areas they oversee, have appropriate authority and have their remuneration directly overseen by the Committee.

### Conflicts of interest

The Policy is designed to avoid conflicts of interest between the Group and its clients and is designed to adhere to local legislation, regulations or other provisions. In circumstances or jurisdictions where there is any conflict between the Policy and local legislation, regulations or other provisions, then the latter prevail. Where the Committee receives input from members of management on the remuneration arrangements in operation across the Group, this never relates to their own remuneration.

### Personal Investment Strategies

The Company adheres to the regulatory principles and industry best practice on the use of personal hedging strategies which act in restricting the risk alignment embedded in employee remuneration arrangements.

### UCITS V Identified Staff / MRTs

The 'Identified Staff' or MRTs of abrdn Fund Managers Limited are those employees who could have a material impact on the risk profile of abrdn Fund Managers Limited or the UCITS V funds it manages. This broadly includes senior management, decision makers and control functions. For the purposes of this disclosure, 'Identified Staff' includes employees of entities to which activities have been delegated.

### Quantitative Remuneration Disclosure

The table below provides an overview of the following:

- Aggregate total remuneration paid by abrdn Fund Managers Limited to its entire staff; and
- Aggregate total remuneration paid by abrdn Fund Managers Limited to its UCITS V 'Identified Staff'.

Amounts shown reflect payments made during the financial reporting period in question. The reporting period runs from **1 January 2025 to 31 December 2025** inclusive.

	Headcount	Total Remuneration £'000
<b>abrdn Fund Managers Limited<sup>1</sup></b>	<b>859</b>	<b>125,424</b>
of which		
Fixed remuneration		95,156
Variable remuneration		30,268
<b>abrdn Fund Managers Limited 'Identified Staff'<sup>2</sup></b>	<b>89</b>	<b>43,006</b>
of which		
Senior Management <sup>3</sup>	38	22,919
Other 'Identified Staff'	51	20,087

<sup>1</sup> As there are a number of individuals indirectly and directly employed by abrdn Fund Managers Limited, this figure represents an apportioned amount of Aberdeen's total remuneration fixed and variable pay, apportioned to the ManCo on an AUM basis. The Headcount figure provided reflects the number of beneficiaries calculated on a Full Time Equivalent basis.

<sup>2</sup> The Identified Staff disclosure relates to UCITS V MRTs and represents total compensation of those staff of the ManCo who are fully or partly involved in the activities of the ManCo.

<sup>3</sup> Senior Management are defined in this table as ManCo Directors and members of the Aberdeen Group plc Board, together with its Executive and Group Operating Committees, Investment Executive members and the Chief Product and Marketing Officer.

# Further Information

abrdrn (Lothian) Pacific Basin Trust is an authorised unit trust scheme, under the FCA regulations.

Consumers' rights and protections, including any derived from EU legislation, are currently unaffected by the result of the UK referendum to leave the European Union and will remain unchanged unless and until the UK Government changes the applicable legislation.

## Documentation and Prices

The current Prospectus for the abrdrn (Lothian) Pacific Basin Trust is available to download at [www.aberdeeninvestments.com](http://www.aberdeeninvestments.com). Copies of the Key Investor Information Documents (KIIDs) and the Annual (and if issued later the interim) Report and Accounts are available on request from the Manager.

## Notices/Correspondence

Please send any notices to abrdrn Fund Managers Limited, PO Box 12233, Chelmsford, CM99 2EE. Any notice to the Manager will only be effective when actually received by the Manager. All notices will be sent to the investor at the address set out in the Application form or the latest address which the investor has notified to the Manager, and will be deemed to have been received three days after posting. Events detailed in these terms and conditions will be carried out on the dates specified, unless the dates are a non-business day, when they will be carried out on the next business day.

## Complaints and Compensation

If you need to complain about any aspect of our service, you should write to the Complaints Team, Aberdeen, PO Box 12233, Chelmsford CM99 2EE, who will initiate our formal complaints procedure. If you prefer, you may call the Complaints Team on 0345 113 6966 or email [complaints@aberdeenplc.com](mailto:complaints@aberdeenplc.com) in the first instance. Alternatively if you have a complaint about the Company or funds you can contact the Trustee directly. A leaflet detailing our complaints procedure is available on request.

We will endeavour to respond to your complaint as soon as possible and will notify you of our outcome within 8 weeks. If the complaint is not resolved by us to your satisfaction then you may have the right take your complaint to the Financial Ombudsman Service (FOS). To contact the FOS Service you should write to The Financial Ombudsman Service, Exchange Tower, London, E14 9SR, email [complaint.info@financial-ombudsman.org.uk](mailto:complaint.info@financial-ombudsman.org.uk) or telephone 0800 023 4567 (free for landlines and mobiles) or 0300 123 9123 (calls cost no more than calls to 01 and 02 numbers) or +44 20 7964 0500 (available from outside the UK – calls will be charged).

We are covered by the Financial Services Compensation Scheme, which means if we become insolvent, you may be entitled to compensation. The level of compensation will depend on the type of business and the circumstances of your claim. Investments are covered up to £85,000 for claims against firms that fail on or after 1 April 2019. Details are available from the FSCS Helpline on 0800 678 1100 or 020 7741 4100 and on the FSCS website: [www.fscs.org.uk](http://www.fscs.org.uk).

## UCITS

The fund was certified under the Undertaking for Collective Investment in Transferable Securities (UCITS) directive, which allows the Manager to market the fund in member States of the European Union subject to relevant local laws, specifically marketing laws.
