

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Global Equity Impact Fund, a US Dollar denominated sub fund of the Standard Life Investments Global SICAV II, Class S Accumulation Shares (ISIN:LU1813714984). The price is expressed in Sterling. Aberdeen Standard Investments Luxembourg S.A. is the Management Company.

Objectives and Investment Policy

The Fund aims to generate growth over the long term by investing in equities which aim to create positive measurable environmental and/or social impacts.

It will invest primarily in equities of corporations listed on recognised stock exchanges. The impact criteria may change from time to time and may include areas such as sustainable energy, recycling practices, health and social care, sanitation, education and employment, agriculture, housing and financial inclusion. The investment team will maintain a diverse asset mix at impact, country, sector and stock level, with the regional, country and sector weightings within the portfolio a by-product of the underlying stock exposure. Their primary focus is on stock selection to try to take advantage of opportunities they have identified. Due to the concentrated nature of the fund investors must be willing to accept a relatively high degree of stock specific risk. The impact criteria applicable to the Fund are set out in an Impact Policy which is available from the Management Company and may be amended from time to time as considered necessary.

Risk and Reward Profile

This indicator reflects the volatility of the fund's share price over the last five years which in turn reflects the volatility of the underlying assets in which the fund invests. Historical data may not be a reliable indication for the future.

As the share class does not have a history of five years, an alternative share class, a comparable fund or a representative benchmark has been used to show how the share class price may have behaved over the period.

The current rating is not guaranteed and may change if the volatility of the assets in which the fund invests changes.

The lowest rating does not mean risk free.

The fund is rated as {4} because of the extent to which the following risk factors apply:

- (a) A concentrated portfolio may be more volatile and less liquid than a more broadly diversified one. The fund's investments are concentrated in a particular country or sector.
- (b) The use of derivatives carries the risk of reduced liquidity, substantial loss and increased volatility in adverse market conditions, such as a failure amongst market participants. The use of derivatives may result in the fund being leveraged (where market exposure and thus the potential for loss by the fund exceeds the amount it has invested) and in these market conditions the effect of leverage will be to magnify losses.

The fund may use derivatives to reduce risk or cost, or to generate additional capital or income at proportionate risk (Efficient Portfolio Management). Derivatives will only be used for hedging or to provide exposures that could be achieved through investment in the assets in which the fund is primarily invested. Usage of derivatives is monitored to ensure that the fund is not exposed to excessive or unintended risks.

Any income, for example dividend income, received by the fund will be reinvested.

Investors in the fund may buy and sell shares on any normal business day.

Recommendation: the fund may not be appropriate for investors who plan to withdraw their money within five years. Investors should satisfy themselves that their attitude to risk aligns with the risk profile of this fund before investing.

(c) The fund invests in equity and equity related securities. These are sensitive to variations in the stock markets which can be volatile and change substantially in short periods of time.

(d) Interpretation of "Impact Investing" will vary according to beliefs and values. Consequently the fund may invest in companies which do not align with the personal views of any individual investor.

The fund employs a single swinging pricing methodology to protect against the dilution impact of transaction costs. A change in the pricing basis will result in movement in the fund's published price.

All investment involves risk. This fund offers no guarantee against loss or that the fund's objective will be attained.

Past performance is not a guide to future returns and future returns are not guaranteed. The price of assets and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment.

Inflation reduces the buying power of your investment and income.

The value of assets held in the fund may rise and fall as a result of exchange rate fluctuations.

The fund could lose money if an entity (counterparty) with which it does business becomes unwilling or unable to honour its obligations to the fund.

In extreme market conditions some securities may become hard to value or sell at a desired price. This could affect the fund's ability to meet redemptions in a timely manner.

The fund could lose money as the result of a failure or delay in operational processes and systems including but not limited to third party providers failing or going into administration.

Charges

The charges you pay are used to pay the costs of running the fund including marketing and distributing it. These charges reduce the potential growth of your investment.

One off charges taken before or after you invest

Entry charge:	5,00%
Exit charge:	0,00%

This is the maximum that might be taken out of your money before it is invested/before the proceeds of your investment are paid out.
