THE FUND

Investment Objective

To generate growth over the long term (5 years or more) by investing in companies with alignment to the Future Supply Chains Theme (as defined below).

Performance Comparator

For comparison purposes, investors can compare the Fund's long-term performance to the MSCI ACWI Index Net Total Return (USD) (the "**Index**") as indicative of the performance of the Future Supply Chains Theme against global equities. The Index is a stock index designed to track broad global equity-market performance. The Index is maintained by Morgan Stanley Capital International and comprises the stocks of nearly 3,000 companies from 23 developed countries and 25 emerging markets. The Fund does not aim to outperform the Index and it is not used for portfolio construction or risk management purposes.

Investment Policy

Portfolio Securities

The Fund will seek to achieve its objective by investing at least 70% of the Fund's Net Asset Value in equities and Equity Related Securities of companies of all sizes listed on Recognised Markets globally including Emerging Markets, with alignment to the Future Supply Chains Theme.

The Fund may invest up to 20% of its Net Asset Value in Mainland China equity and Equity-Related Securities through the Shanghai-Hong Kong and Shenzhen-Hong Kong Stock Connect programme.

The Future Supply Chains Theme can be broadly defined as investment in companies considered to be beneficiaries of the evolving dynamics and structure of global trade. The Investment Manager believes that global trade is evolving and there are companies whose business puts them in a better position to benefit from these changes and thus present investment opportunities for investors. The Investment Manager carries out a fundamental assessment of the business of the companies in the portfolio to define their relevance to the Future Supply Chains Theme, their ability to generate value from their position in the value chain and exposure to the Future Supply Chains Theme, as well as the extent to which the opportunity set is priced into the shares of companies.

The Investment Manager assesses company alignment with the Future Supply Chains Theme against three key pillars:

- Technology Independence — a structural and global shift towards domestic intellectual property, research & development and production capabilities driven by governmental policies and geopolitical shifts. These policies and shifts are to more importance being placed on having control over technology capabilities and developments (from materials required to support them to the intellectual property around them) in order to ensure more independence and less dependency on sets of other countries.
- Resilient Supply Chains – shorten, simplify and/or localise supply chains to make them less vulnerable to disruption.
- Decarbonisation & Energy Security – improve the efficiency of energy production and the security and cost of energy supply

In determining Future Supply Chains Theme alignment, the Investment Manager seeks to identify companies which are aligned to at least one of the above three key pillars.

The Fund may also invest up to 20% of its Net Asset Value in companies with Variable Interest Entity structures in order to gain indirect exposure to companies with foreign ownership restrictions.

The Fund may invest up to 10% of its Net Asset Value in other regulated, open-ended collective investment schemes, including alternative investment funds, ETFs and money market funds, as described under "Investment in other Collective Investment Schemes" in the "Investment Objective &

Investment Techniques” section of the Prospectus (including those managed by abrdn), Money-Market Instruments, and Cash for Liquidity management.

Management Process

The Fund is actively managed.

The Fund’s investment universe is generated through a combination of proprietary research (such as financial analysis and company engagement at both stock and sector level) and third-party research and data (such as third-party research papers on the theme and thematic taxonomies) of companies listed globally to identify those that have or are expected to have exposure to the Future Supply Chains Theme.

The portfolio is then constructed from this universe, using a proprietary quantitative model, based on mathematical and/or statistical rules to select companies and assign weights to these companies in order to optimise exposure to the key pillars, whilst maintaining diversification (stock and pillar (see the three key pillars above)), and liquidity.

No benchmark is used for portfolio construction or as a basis for setting risk constraints in the management of the Fund.

Derivatives and Techniques

The Fund may use Derivatives, namely, exchange-traded equity Futures, equity Index Futures, FX and FX forwards non-deliverable forwards, described under “*Use of Financial Derivative Instruments*” in the “*Investment Objective & Investment Techniques*” section of the Prospectus to reduce risk, reduce cost and/or generate additional income or growth consistent with the risk profile of the Fund (often referred to as “Efficient Portfolio Management”).

Derivatives will typically be used to maintain allocations to Company shares while meeting Cash inflows or outflows. Where Cash inflows or outflows are large relative to the size of the Fund, derivative usage may be significant for limited periods of time. Derivative usage in the Fund otherwise is expected to be very limited.

In connection with Hedged Classes only, the Fund may also enter into transactions in Derivatives – specifically, FX forwards and FX non-deliverable forwards - in order to hedge against movements of the Class Currency relative to the currencies in which the Fund’s assets are denominated or to hedge against movements of the Class Currency relative to the Base Currency. Any such Class hedging transactions will be undertaken in accordance with the ICAV’s currency hedging policy as set out in the section entitled “**Currency Transactions – Currency Hedging at Share Class Level**” in the Prospectus and in accordance with Appendix C of the Prospectus.

The equity securities invested in by the Fund will be listed, traded and dealt with on one or more of the Recognised Markets set out in Appendix B to the Prospectus.

There is no guarantee that the Fund will achieve its investment objective.

Base Currency

The Base Currency of the Fund is USD.

EU's Sustainable Finance Disclosure Regulation/ Taxonomy Regulation Disclosure

This Fund is subject to Article 6 of the EU Sustainable Finance Disclosure Regulation (Regulation (EU) 2019/2088) ("**SFDR**") and is not also subject to Article 8 or Article 9 of SFDR. Further information can be found under section "EU's Sustainable Finance Disclosure Regulation – Sustainability Risk Integration" of the Prospectus.

The investments underlying the Fund do not take into account the EU criteria for environmentally sustainable economic activities.

The Investment Manager believes that sustainability factors can be financially material and can meaningfully impact an asset's performance. Sustainability factors can represent both an opportunity as well as a risk to the future return of an investment. The Fund's investment process integrates environmental, social and governance ("**ESG**") factors but does not promote environmental or social characteristics or have a specific sustainable investment objective. This means that whilst sustainability risk factors and risks are considered, they may or may not impact portfolio construction and the Fund's return profile. By integrating ESG factors and their associated sustainability risks into the process of identification and selection of eligible securities, the Investment Manager has assessed the potential impact on the return of the Fund to be limited.

The Investment Manager's sustainability risk integration requires, in addition to its inclusion in the investment decision making process, appropriate monitoring of sustainability considerations in risk management and portfolio monitoring. The Investment Manager believes that sustainability risks can be a key driver of financial performance for some assets but less relevant for others, as such the Investment Manager's aim in integrating consideration of these risks is to enhance the value of the Fund's portfolio. Further information on abrdn's Sustainability Risk Integration is available at www.abrdn.com.
