

Key Features of the abrdn Life Retail Trustee Investment Policy – (RTIP and RPPIP policies)

31 March 2025

The Financial Conduct Authority is a financial services regulator. It requires us, abrdn Life and Pensions Limited (“abrdn Life”), to give you this important information to help you decide whether the abrdn Life Trustee Investment Policy is right for you. You should read this document carefully so that you understand what you are buying, and then keep it safe for future reference.

Introduction

The business of the Company

abrdn Life and Pensions Limited “abrdn Life” is an authorised insurance company regulated by the Prudential Regulation Authority “PRA” and Financial Conduct Authority “FCA” for activities in relation to long-term insurance business. Details of our regulatory permissions can be found on the FCA register register.fca.org.uk using reference 187323.

The registered office is 280 Bishopsgate, London, United Kingdom, EC2M 4AG. The registered number is 03526143. The Company is a wholly owned subsidiary of Aberdeen Group plc.

In practice the Company serves as an efficient delivery mechanism of Aberdeen investment management services to UK institutional pension scheme clients (both defined benefit and defined contribution) and other UK insurance entities through reinsurance of their unit-linked liabilities. The Company does not bear any insurance risk as all benefits of the policies are tied to the value of assets in the underlying internal linked funds by unit linking.

abrdn Life offers Trustee Investment Policies (the “Policy”) on an execution only basis, to the trustees of pension schemes (“Policyholders”) that are registered pension schemes under Chapter 2 of the Finance Act 2004.

This includes UK occupational pension schemes (whether defined benefit or defined contribution) and personal pensions operating under trust, including most self- invested personal pensions (SIPPs).

abrdn Life has appointed abrdn Investments Limited (“aIL”) (another company in the Aberdeen Group, FCA reference number 121891) to provide management services which includes product distribution services. aIL (formerly Aberdeen Asset Managers Limited) is not under a contractual obligation to conduct insurance distribution exclusively for abrdn Life; neither abrdn Life nor aIL provides any investment advice or personal recommendations on the basis of fair and personal analysis as defined in FCA rules about insurance contracts. aIL also acts as an investment manager for other Aberdeen Group plc entities’ funds which some of abrdn Life’s funds may invest in.

Trustees wishing to obtain financial advice, taking account of their specific circumstances, should speak to an independent financial adviser.

A copy of the abrdn Life Solvency and Financial Condition Report can be found on our website under Financial Information and Reports: <https://www.abrdn.com/en-gb/institutional/funds/our-life-fund-range?tab=2>

Board of Directors

- David Hare (Non-executive Chairman)
- Aron Mitchell (Chief Executive Officer)
- David Vallery (Non-executive Director)
- Emma Herd (Director)
- Doug Vick (Director)

The Board serves in an oversight capacity to protect the interests of policyholders and to verify that management is complying with relevant legislation and regulation.

The Board pays particular attention to the assets of the Company and its solvency position with regard to the requirements of the PRA.

Governance and control

Day to day governance and risk control is delegated to Aberdeen Group (including the abrdn Life management team) via a formal Management Services Agreement with aLL. Services are provided by the Group's various operating entities and overseen by the committees which make up its risk control framework. abrdn Life regularly reviews the risks that are applicable to the company and oversees any actions resulting from occurrences of these.

Employee Remuneration

The following link sets out the remuneration policy for Aberdeen Group plc and describes overarching principles and practice for remuneration. This policy applies to abrdn Life and aLL.

Aims of the Policy

The purpose of the Policy is to provide an 'investment only' product to permit trustees of registered pension schemes to invest over the long term (5 years or more) in one or more of a range of pooled funds, following receipt of investment instructions via an application form. This Key Features Document is intended mainly for the use of trustees of registered pension schemes and their professional advisers. Any reference to 'you' or 'yours' refers to the trustees/policyholders.

Your Policy Document contains the terms and conditions applicable to your Policy. If there are differences between the information in this document and your Policy Document, the terms of your Policy Document shall prevail.

This document provides you with the following information:

- The most important things that you should know about the Policy; further details about the Policy are contained in your Policy Document.
- Details of the available funds including their summary investment objectives, annual management charges (AMC), other expenses (deducted to cover the servicing costs) and the risks specific to each fund.
- The effects of charges deducted from example funds on the total value of the fund over different durations.
- Further information such as how to contact us, how to complain and how to apply for compensation.

Your Investment

Your investment takes place as a result of you paying premiums to a Policy, which is an insurance contract between the trustees and abrdrn Life. The terms and conditions of the Policy are set out in your Policy Document and the main features are described below.

The Policy does not have a fixed term, however it is intended for investment over the long term (5 years or more).

The Policy permits only single premiums. You have taken out the Retail version of the Policy which is closed to new premiums. Switching between the available funds and unit classes as detailed in Appendix 1 of this document is permitted.

The premiums are used to purchase units in whichever unit-linked fund(s) you have selected. The price of the units in each fund is calculated daily at a published valuation point.

You may request a surrender of some or all of the units allocated to you, on any business day at the prices calculated at the next applicable valuation point for the relevant funds. The non-dealing day calendar is available on the abrdrn Life website: <https://www.abrdrn.com/docs?editionid=0aa5dcf5-ec2b-4c6b-9374-8b8e134de260>

You may switch between each of the funds you have selected or into other funds made available by abrdrn Life, detailed in Appendix 1 of this document, at no cost. Note that switching between funds with different valuation points and dealing cycles may lead to you being out of the market, and therefore not exposed to market movements affecting the value of the units in the funds, for a period of time while the transaction is processed.

The benefits achieved are dependent on the performance of the assets in which your chosen funds are invested, as well as on the charges deducted.

Charges shown in this document are expressed as annual percentages and are either deducted from the assets of your chosen fund(s) on a daily basis or are payable by quarterly invoice. There are no initial charges.

Risks

The value of investments can fall as well as rise, is not guaranteed and could be less than the money paid in. All investments involve a degree of risk of some kind. Some of these risks are general, which means that they apply to certain types of investments or all investments, examples of these are given below. Others are specific, which means that they apply to individual funds. Before you decide to invest, it is important to understand these risks. The risks apply irrespective of whether the holdings are held directly by the abrdrn Life Fund or indirectly through a fund which is held by abrdrn Life.

Descriptions of the fund specific risks are given in Appendix 3 and the table in Appendix 2 indicates which risks apply to which funds.

General Risks

Market risk

Prices and yields of many securities and instruments can change frequently and can fall based on a wide variety of factors such as political and economic news, government policy and climate change. The effects of market risk can be immediate or gradual, short term or long-term, narrow or broad.

Liquidity risk

There may be difficulty in selling an investment caused by a number of factors, including but not limited to insolvency of the investment, adverse stock market conditions, selling restrictions placed on funds by their managers (sometimes referred to as gating, lockups, notice periods or suspension of redemptions) or due to the nature of the underlying investment, e.g. real estate. Even if the investment can be sold, the price it can be sold for may be adversely affected.

Performance risk

The manager appointed to manage the fund investments may be wrong in its analysis, assumptions, or projections. This includes projections concerning industry, market, economic, demographic, or other trends.

Inflation risk

Over time, inflation can erode the real value of investment gains. With investments that produce low returns, inflation can negate any gains in buying power or even cause investors net buying power to decline over time.

Tax

A country could change its tax laws or treaties in ways that affect investors. Tax changes potentially could be retroactive and could affect investors with no direct investment in the country.

Turnover

When securities are bought and sold (turned over) they incur transaction costs. High levels of turnover may have a negative impact on a fund's performance.

Regulatory risk

A change in laws and regulations could materially impact a security, business, sector, or market or make changes to the operations of funds resulting in the way funds are managed.

Questions and Answers

How does the Policy work?

- The Policy is owned by the trustees of the pension scheme in order to pay benefits to the members.
- The trustees may surrender units at any time to obtain the cash required for the payment of benefits to scheme members. Surrender amounts are not guaranteed.

How are premiums invested?

- Premiums may be invested in one fund or spread across a range of the selected funds. Retail policies cannot accept new premiums but you can switch between available funds.
- Settlement cycle information for each fund can be found in the Fund Data table in Appendix 1.
- The abrdn Life dealing guide gives further detail on the process for buying, selling and switching units in abrdn Life funds and is available on our website: <https://www.abrdn.com/en-gb/institutional/funds/our-life-fund-range>

What investment options are there?

- abrdn Life offers a choice of investment funds under the Policy. A full list of funds and charges is given in the Fund Data table in Appendix 1. A summary of each fund's investment objective is given in the table in Appendix 2.
- Fact sheets relating to each fund are produced quarterly. These carry details of the specific fund objectives, performance and associated risk factors. These are published on our website <https://www.aberdeeninvestments.com/en-gb/institutional/funds/our-life-fund-range>.

When are the funds valued?

- All funds are priced daily. The valuation points for each of the funds are given in the Fund Data table in Appendix 1.
- The prices take into account the values of the underlying investments held by each fund. The unit prices for the funds are published on our website each day.

How are the funds priced?

- The price of units in each fund depends on the value of the investments, assets and liabilities held within that fund and the number of units in issue at the valuation point.

- All dealing takes place at the single price for each fund calculated at the published valuation point for the fund.
- A dilution adjustment will be applied to the price of units where there is a large influx of money into or exit of money from a fund. This is to prevent dilution of a fund as a result of incurring underlying transaction costs. This adjustment is applied by using a mechanism known as 'swinging single price' whereby sales proceeds are reduced or purchase costs are increased thereby protecting existing and incoming shareholders. Dilution adjustments can also apply to other funds held for investment purposes within the fund. Where underlying funds do not attract dilution via a swing price mechanism, but rather via an Anti-Dilution Levy (ADL), the feeder funds may attract a dilution charge to reflect ADL being applied to the underlying funds.

What are the charges?

- Where the Policy invests in Net Units, charges are deducted from the value of the fund on a daily basis in the calculation of the unit price. Where the Policy invests in Gross Units the trustees are normally invoiced for management charges on a quarterly basis. Depending on the terms of the Policy, the trustees may receive a quarterly rebate of charges. This is referred to as a Premium Credit in your Policy Document.
- The level of management charges applicable to this Policy are shown in the Fund Data table in Appendix 1. Where the Policy invests in Gross Units for which management charges are payable by invoice, the level of management charges are shown in a separate written agreement with the policyholder.
- Where a fund invests in a collective investment scheme or another unit-linked fund the price of the underlying fund may be subject to dilution adjustment as described above.
- Where a fund invests in a collective investment scheme, or another unit-linked fund the management charges of the underlying fund are rebated to avoid double charging. However, additional expenses may be incurred in both the fund and any underlying fund. These expenses are reflected in the Additional Expenses included in the Fund Data table in Appendix 1.
- Some Policies are subject to an overall minimum annual charge, which abrdn Life has currently waived at its discretion.

Can investments be switched?

- Yes. You may switch your investment into other available abrdn Life Funds at any time, free of charge. If you wish to switch into a new fund please contact the abrdn ICS team at SS&C beforehand. Note that switching between funds with different valuation points and dealing cycles may lead to you being out of the market for a period of time while the transaction is processed.

How are units surrendered?

- All or part of your investment may be surrendered at any time. abrdn Life supports electronic dealing via Calastone and EMX. Alternatively, Trustees should submit a suitably completed dealing form by post or fax, signed by authorised signatories in accordance with the arrangements agreed with abrdn Life.

- Surrender proceeds will usually be paid by abrnn Life in line with the settlement cycle for the funds you are invested in. Information on the settlement cycle for each fund can be found in the Fund Data table in Appendix 1.

Can the Policy be cancelled or terminated?

- You are able to terminate your policy as per the terms in your Policy Document. If you surrender all units allocated to your Policy, the Policy shall automatically terminate unless you and abrnn Life mutually agree otherwise.

Can abrnn Life amend or terminate the Policy?

- Yes. The amendment and termination rights applicable to your Policy can be found in your Policy Document.

How is income treated?

- For the funds available under the Retail policy there are no distributions from the funds as all income and tax recovered is retained within the funds and so increases the value of the units.

What is the law applicable to the Policy?

- Your Policy Document sets out the law governing your Policy.

What about Tax?

- Tax relief will be given to scheme members for pension contributions in line with prevailing HMRC rules and no further tax relief will be given for investment into this Policy. Investment income and capital gains are free from UK tax. The funds are not able to recover tax deductions made at source from UK dividends. The tax information provided here is based on our interpretation of current legislation and HMRC practice, which is subject to change.

What documentation will I get?

- You will receive switch and claim dealing instruction forms to retain for future use.
- We will send you regular reports showing transactions and valuations. Quarterly investment reports commenting on the investment performance of your chosen funds over the past quarter, are available on request.
- We also provide annual audit reports plus ad-hoc audit reports and investment reviews when requested to do so. Please contact the abrnn ICS team at SS&C if you wish to request these.

Further information

How to Contact Us

Further details or information may be obtained by contacting the abrdn ICS Team at SS&C

- By Telephone:

UK - 0330 123 1379

Overseas - 44 (0)1268 445 661

Lines are open between 8am and 6pm UK time, Monday to Friday. Call charges can vary.

- By Fax:

UK - 0330 123 3685

Overseas - 44 (0)1268 457 713

- By E-mail:

abrdn.ics@uk.sscinc.com

Please note email is not a secure form of communication so you should not send any personal or sensitive information.

- By Post:

abrdn Life
SS&C ICS Department
PO Box 12381
Chelmsford
CM99 2ET

How to complain

If the trustees are unhappy with any part of the service they have received or if they have any queries, they should contact the abrdn ICS Team at SS&C:

- By Telephone:

UK - 0330 123 1379

Overseas - 44 (0)1268 445 661

Lines are open between 8am and 6pm UK time, Monday to Friday. Call charges can vary.

- By E-mail:

abrdn.ics@uk.sscinc.com

Please note email is not a secure form of communication so you should not send any personal or sensitive information.

If the trustees are not satisfied with the response they may, in certain circumstances, be able to refer the complaint to the Financial Ombudsman Service, at Exchange Tower, London E14 9SR.

Making a complaint will not affect the trustees' rights to take legal action.

Customer Classification, Financial Advice and Policyholder Demands and Needs

Trustees of registered pensions schemes are subject to legal obligations themselves under The Pensions Act 2004, which includes a requirement to have relevant knowledge and understanding. abrdn Life and aLL do not provide investment advice to the Trustees and considers that Trustees are capable of making their own investment decisions and understanding the risks involved.

This document is for Trustees invested in the Retail versions of the abrdn Life Trustee Investment Policy, specifically the Retail Trustee Investment Plan (RTIP) and the Retail Personal Pension Investment Plan (RPPIP).

Compensation

abrdn Life is regulated by the FCA and PRA. Policyholder protection is available via the Financial Services Compensation Scheme ("FSCS") if abrdn Life would be unable to meet claims against it, for example if it was placed into liquidation. The FSCS pays compensation only for financial loss, with pensions savings provided under a life insurance contract covered in full. Although, ultimately, the FSCS will decide eligibility, all abrdn Life policyholders should be eligible to claim under the FSCS apart from those policyholders that are insurance companies. For further details of compensation arrangements, please contact the FSCS at <https://www.fscs.org.uk/contact-us/>

Charges and Additional Expenses

The Total Expense Ratios for abrdn Life funds consist of the Annual Management Charge applicable to each share class and any associated additional expenses. They are reviewed periodically and updated after each year end. Additional expenses currently include third party costs associated with the following services: fund administration, custody, transfer agency. Expenses from underlying funds held are also included on a look-through basis.

Further information on the current level of additional expenses for each fund is available in the Fund Data table in Appendix 1.

The effects of deductions

Warning - If you surrender during the early years, you could receive less than you paid in.

What are the deductions for?

- The deductions cover investment management costs and service charges.
- abrdn Life will not pay commission to an advisor in respect of any contribution made to the Policy.

The tables below give an example of how your investment could be affected by deductions. An example is given for the highest charging fund in each main asset class.

Equity and Multi-Asset Funds - Example of Impact of Deductions - abrdn Life Emerging Markets Equities Pension Fund

At end of year	Total paid in to date (£)	Effect of deductions to date (£)	What you might get back at 4% p.a. (£)
1	100,000	1,210	102,000
2	100,000	2,500	105,000
3	100,000	3,880	108,000
4	100,000	5,350	111,000
5	100,000	6,910	114,000
10	100,000	16,300	131,000

- The calculation assumes an initial investment premium of £100,000, an annual management charge (AMC) of 1.0%, other charges including service charges of 0.17% and that there are no upfront charges.
- It also assumes that income is re-invested. The last two columns assume that investments will grow at 4% per annum.

- The AMC shown is the highest currently paid by investors in any available abrdn Life fund.
- The last line in the table above shows that, over a 10-year term, the effect of the total deductions could amount to £16,300. Putting it another way, this would have the same effect as bringing investment growth down from 4% a year to 2.8%.

Fixed Income Funds - Example of Impact of Deductions - abrdn Life High Yield Bond Fund

At end of year	Total paid in to date (£)	Effect of deductions to date (£)	What you might get back at 2% p.a. (£)
1	100,000	590	101,000
2	100,000	1,200	102,000
3	100,000	1,830	104,000
4	100,000	2,480	105,000
5	100,000	3,150	107,000
10	100,000	6,870	115,000

- The calculation assumes an initial investment premium of £100,000, an annual management charge (AMC) of 0.45%, other charges including service charges of 0.13% and that there are no upfront charges.
- It also assumes that income is re-invested. The last two columns assume that investments will grow at 2% per annum.
- The last line in the table above shows that, over a 10-year term, the effect of the total deductions could amount to £6,870. Putting it another way, this would have the same effect as bringing investment growth down from 2% a year to 1.4%.

Real Estate Funds - Example of Impact of Deductions - abrdn Life Global Real Estate Fund

At end of year	Total paid in to date (£)	Effect of deductions to date (£)	What you might get back at 4% p.a. (£)
1	100,000	1,240	102,000
2	100,000	2,560	105,000
3	100,000	3,970	108,000
4	100,000	5,480	111,000
5	100,000	7,080	114,000
10	100,000	16,700	131,000

- The calculation assumes an initial investment premium of £100,000, an annual management charge (AMC) of 0.95%, other charges including service charges of 0.25% and that there are no upfront charges.

- It also assumes that income is re-invested. The last two columns assume that investments will grow at 4% per annum.
- The last line in the table above shows that, over a 10-year term, the effect of the total deductions could amount to £16,700. Putting it another way, this would have the same effect as bringing investment growth down from 4% a year to 2.8%.

Liquidity Funds - Example of Impact of Deductions - abrdn Life Deposit and Treasury Pension Fund

At end of year	Total paid in to date (£)	Effect of deductions to date (£)	What you might get back at 0.5% p.a. (£)
1	100,000	271	100,000
2	100,000	544	100,000
3	100,000	818	100,000
4	100,000	1,090	100,000
5	100,000	1,370	101,000
10	100,000	2,800	102,000

- The calculation assumes an initial investment premium of £100,000, an annual management charge (AMC) of 0.25%, other charges including service charges of 0.02% and that there are no upfront charges.
- It also assumes that income is re-invested. The last two columns assume that investments will grow at 0.5% per annum.
- The last line in the table above shows that, over a 10-year term, the effect of the total deductions could amount to £2,800. Putting it another way, this would have the same effect as bringing investment growth down from 0.5% a year to 0.2%.

Appendix 1 - FUND DATA TABLE

Appendix 2 – Fund Specific Guidelines

References to performance targets are those which the Investment Manager aims to achieve as at the date of this document. These targets are not based on past performance, may be subject to change and cannot be guaranteed.

The value of investments can fall as well as rise, is not guaranteed and could be less than the money paid in.

Appendix 3 – Fund Specific Risk Factors

Risk factors to consider when investing in abrdn Life funds

Fund specific risks

The abrdn Life funds have different investment objectives, which define their areas of investment.

The fund specific risks highlighted below may also apply to your investment. The Fund Specific Guidelines table in Appendix 2 of this document sets out which risks apply to each fund. Information can also be found on the fund Factsheets on our website <https://www.aberdeeninvestments.com/en-gb/institutional/funds/our-life-fund-range>.

Equity risk

Equities can lose value rapidly, have frequent price changes (be volatile) and typically involve higher (often significantly higher) market risks than bonds or money market instruments. If a company goes through bankruptcy or a similar financial restructuring, its equities may lose most or all of their value.

Interest rates risk

When interest rates rise, bond values generally fall. This risk is generally greater the longer the time to repayment of the borrowed monies.

Inflation risk

Over time, inflation can erode the real value of investment gains. With investments that produce low returns, inflation can negate any gains in buying power or even cause investors net buying power to decline over time.

Credit risk

A bond or money market security could lose value if the issuer's financial health deteriorates, or in extreme cases the issuer could go into default (cease to make timely payments of principal or interest).

High Yield Credit risk

Credit risk and interest paid are greater the lower the credit quality of the debt. A decline in creditworthiness or curtailment of interest payments may also cause a bond to become more volatile and less liquid and more sensitive to economic events. Lower quality bonds are more likely to default on obligations, and to be unable to repay

principal if they do, particularly if they are unsecured or subordinate to other obligations. Debt issued by governments and government-owned or -controlled entities can be subject to many risks, especially in cases where the government is reliant on payments or extensions of credit from external sources, is unable to institute the necessary systemic reforms or control domestic sentiment or is unusually vulnerable to changes in geopolitical or economic sentiment. Even if a government issuer is financially able to pay off its debt, investors may have little recourse should it decide to delay, discount or cancel its obligations.

Emerging Markets risk

Emerging markets are less established, and more volatile, than developed markets. They involve higher risks, particularly market, credit, illiquid security, regulatory and exchange rate risks, and are more likely to experience risks that in developed markets are associated with unusual market conditions.

There is an increased chance of political and economic instability with less reliable custody, dealing and settlement arrangements which may worsen price volatility and cause market disruptions.

For purposes of risk, the category of emerging markets includes markets that are less developed, such as most countries in Asia, Africa, South America and Eastern Europe, as well as countries such as China, Russia and India that have successful economies but may not offer the highest levels of investor protection.

Exchange Rates risk

Changes in currency exchange rates could reduce investment gains or increase investment losses, in some cases significantly. Exchange rates can change rapidly and unpredictably, and it may be difficult for the fund to unwind its exposure to a given currency in time to avoid losses. Changes in exchange rates can be influenced by such factors as export-import balances, economic and political trends, governmental intervention, and investor speculation.

Intervention by a central bank, such as aggressive buying or selling of currencies, changes in interest rates, restrictions on capital movements or a “de-pegging” of one currency to another, could cause abrupt or long- term changes in relative currency values.

Asset Backed/Mortgage Backed Securities (ABS/MBS) risk

ABSs and MBSs hold an interest in a pool of debt, such as credit home mortgages and home equity loans. ABSs and MBSs also tend to be of lower credit quality than many other types of debt securities. To the extent that the debts underlying an ABS or MBS go into default or become non-collectable, the securities based on those debts will lose some or all of their value.

ABSs and MBSs typically carry prepayment and extension risk and can carry above-average liquidity risk. “Prepayment” occurs when the issuer of a debt security repays the instrument earlier than expected. “Extension” occurs when the issuer of a debt security postpones the date when they will repay. Either event may impact a fund investing in these securities, either through incurring unexpected transaction charges or through a change in value of the security.

Convertible Securities and Contingent Convertible Securities risk

Because convertible securities are structured as bonds that typically can, or must, be repaid with a predetermined quantity of equity shares, rather than cash, they carry both equity risk and the credit and default risks typical of bonds.

Contingent convertible securities (coco bonds) are comparatively untested, their income payments may be cancelled or suspended, they are more vulnerable to losses than equities, they carry extension risk, and they can be highly volatile. A coco bond can lose some or all of its value instantaneously if a trigger event occurs (such as the issuer experiencing certain capital ratios). Because coco bonds are in effect perpetual loans, the principal amount may be paid off on the due date, anytime afterward, or never.

How coco bonds will behave in various market situations is unknown, but there is a risk that volatility or price collapses could spread across issuers and that the bonds could become illiquid.

Money Market Funds (MMFs)

Short Term Low Volatility Net Asset Value Money Market Fund (LVNAV) to Short Term Variable Net Asset Value Fund (VNAV) Conversion risk

Although Money Market Instruments are perceived to be relatively low risk in nature, they are not risk-free. Inflation can exceed the returns after fees have been taken into account and the issuer of the debt could fail to fulfil its obligation to pay back the borrowed amount.

Although the fund is a Short-Term Low Volatility Net Asset Value Money Market Fund (LVNAV) where subscriptions and redemptions of income shares are normally carried out at a price equal to the Constant NAV, this is not guaranteed. Where circumstances arise that no longer permit the fund to maintain a Constant NAV, subscriptions and redemptions of income shares will instead be carried out at a Variable NAV. Similarly, should interest and deposit rates become low or negative, income shares may be converted into accumulation shares, where all subscriptions and redemptions are carried out at a Variable NAV.

Specialist Country Specific Funds risk

If a fund is a specialist country-specific fund, the investment carries greater risk than a fund diversified across more countries.

Small/mid - capitalisation companies risk

Stocks of small and mid-size companies can be more volatile than stocks of larger companies. Small and mid-size companies often have fewer financial resources, shorter operating histories, and less diverse business lines, and as a result can be at greater risk of long-term or permanent business setbacks. Initial public offerings (IPOs) of small and mid-capitalisation companies can be highly volatile, giving them disproportionate impact on the fund's share price, and can be hard to evaluate because of a lack of trading history and relative lack of public information.

Concentration risk

To the extent that the fund invests a large portion of its assets in a limited number of industries, sectors, or issuers, or within a limited geographical area, it can be more risky than a fund that invests more broadly.

Concentrated investments are more sensitive to the factors that determine market value for the area of focus and might be harder to buy and sell as the amount bought or sold may be large in comparison to normal market transaction volume. These factors may include economic, financial or market conditions as well as social, political, economic, environmental or other conditions. The result can be both higher volatility (more frequent up and down changes in value) and a greater risk of loss.

Derivatives risk

Derivatives are financial products that derive their value from a relationship to another underlying asset. Often the relationship is a multiple of the underlying asset. Certain derivatives could behave unexpectedly or could expose the fund to losses that are significantly greater than the cost of the derivative. Derivatives in general are highly volatile and do not carry any voting rights. The pricing and volatility of many derivatives (especially credit default swaps, a type of derivative that provides a payment if the issuer of a bond defaults on its obligations) may diverge from strictly reflecting the pricing or volatility of the underlying securities that the derivative references.

Counterparty risk arises if one of the parties involved in a trade defaults on the contract and this can affect the valuation in the Fund. This risk is higher in non-exchange traded transactions, which can be less regulated than those executed on financial exchanges. Counterparty risk is managed by robust risk management practices and limits on exposure to counterparties.

Property/Real Estate Investment Trust (REIT) risk

Property investments can be affected by any factor that makes an area or individual property less valuable.

Specifically, they may be affected negatively by natural disasters, economic declines, overbuilding, zoning changes, tax increases, population or lifestyle trends, environmental contamination, defaults on mortgages, failures of management, and other factors that may affect the market value or cash flow of the investment.

Investments in real property are illiquid and incur high transaction costs and under adverse market conditions the sale of such assets may take considerable time.

If properties have to be sold quickly this could result in lower prices being obtained for them. Where the fund maintains a portion of its portfolio in assets with better liquidity, such as cash, near-cash and securities, rather than in physical properties, the performance of the fund may be different from the performance of the underlying commercial property sector. In extreme market conditions, should the fund be experiencing significant levels of redemptions, the fund may exhaust its immediately available assets in paying those redemptions and may therefore need to be temporarily suspended. Investors will be unable to withdraw from the fund while it is suspended.

Real Estate Investment Trusts (REITs)

Many issuers of real estate related securities are highly leveraged, which can make their securities more volatile. The value of real estate-related securities does not necessarily track the value of the underlying assets.

REITs can sometimes have set income distribution pay-out cycles which may not align with distribution periods of the investing fund and hence impact monies paid out.

China A/Stock Connect risk

China A shares are shares quoted on the domestic markets in China and subject to the regulatory regime of the People's Republic of China (PRC).

Foreigners can access limited China A shares through a mutual market access system, Stock Connect, which connects Hong Kong with the Shanghai and Shenzhen stock exchanges. The limits and rules of Stock Connect may change at any time. The China A shares traded are uncertificated and are held in the name of a settlement agency or its nominee. PRC law may not recognise the beneficial ownership of the China A shares by the investing fund and, in the event of a default of one of the agents it may not be possible for the China A shares held by the fund to be recovered.

Assets owned by different investors are held collectively and may be subject to lower safekeeping, segregation and record keeping requirements than investments held domestically.

These shares are priced in the Chinese local currency, the Renminbi (RMB). The exchange rate for RMB may be affected by, amongst other things, any exchange control restrictions imposed by the government in the PRC which may adversely affect the market value of these Funds.

Variable Interest Entity risk

The fund may invest in companies with Variable Interest Entity (VIE) structures in order to gain exposure to industries with foreign ownership restrictions. VIE structures may be adversely affected by changes in the legal and regulatory framework. This may result in losses, or force the fund to sell the VIE which could have a negative impact on the fund's performance.

Environmental Social and Governance (ESG) risk

Applying ESG and sustainability criteria in the investment process may result in the exclusion of securities within the fund's benchmark or universe of potential investments. The interpretation of ESG and sustainability criteria is subjective meaning that the fund may invest in companies which similar funds do not (and thus perform differently) and which do not align with the personal views of any individual investor.

Tracking Error risk

The fund may not perform fully in line with the index which it is tracking because of factors which may include transaction costs, timing and holding mismatching, or in the event of extreme market disruption.

Closed End Fund/Investment Trust risk

Closed-ended funds (Investment Trusts) may trade at a discount or premium to the value of their underlying assets, meaning that investors in the Fund are exposed to changes in these premiums or discounts as well as changes to the value of the underlying assets held by such funds. A reduction in the premium or an increase in the discount will negatively impact investors' returns.

Private Markets risk within UCITS Pooled Fund

The fund invests in companies that are listed on stock markets. The value of these companies is driven by the growth and performance of the underlying private market assets in which they invest. Private market assets have different or additional risks when compared to public market assets. Such risks include the use of leverage (debt), which may magnify losses in adverse market conditions, and reduced transparency in terms of the performance and valuation of private market investments. Because private market assets liquidity is lower than for public market assets and more dependent on a favourable realisation environment when such assets are sold.

Property Liquidity Risk

Commercial property is less liquid than other asset classes such as bonds or equities. Selling property can be a lengthy process so investors in the fund should be aware that they may not be able to sell their investment when they want to.

Property Transaction Charges

Commercial property transaction charges are higher than those which apply in other asset classes. Investors should be aware that a high volume of transactions would have a material impact on fund returns.

Property Valuation Risk

Property valuation is a matter of judgment by an independent valuer and is therefore a matter of the valuer's opinion rather than fact.

Appendix 4 - General Investment Guidelines

General

All investments, other than for funds that are restricted to Defined Benefit schemes, must comply with the requirements of Chapter 21, “Permitted links and conditional permitted links” of the FCA Conduct of Business Sourcebook, (COBS 21) and the PRA Solvency II Firms “Investments” rulebook, which may be amended from time to time. Additional restrictions are set out below.

Compliance with the permitted links rules is achieved by the Company setting out what instruments and strategies are permitted via eligible investments in Appendix 2 – Fund Specific Guidelines and more general guidelines in this Appendix. Any new instruments being added are part of a governance process that requires the permitted link rules to be considered prior to investment.

All investments must be classified according to their economic behaviour ahead of their legal form.

Securitised instruments are not permitted without the approval of the Chief Executive.

Derivatives

Derivatives are permitted for use directly in certain abrdn Life unit-linked funds, where noted under eligible investments in Appendix 2. New derivative instruments may be added to funds with the permission of the abrdn Life Board. This does not affect their use in the underlying funds into which abrdn Life funds feed. The Fund Specific Guidelines table in this document notes ‘Derivatives risk’ under those funds which use derivatives either directly or within the underlying fund.

Warrants

Not more than 5% of the value of the property of a unit-linked fund shall consist of warrants and these must be listed on a regulated market. Warrants can be held only if it is reasonably foreseeable that the right to subscribe conferred by such warrants could be exercised by the fund without contravening the investment restrictions.

Under no circumstances may warrants be used for purposes of gearing a unit-linked fund.

Stock lending

abrdn Life does not currently permit stock lending within its unit-linked funds. However, stock lending may take place in the underlying funds into which abrdn Life funds feed.

Underwriting/sub-underwriting

Underwriting occurs during a rights issue, whereby an Aberdeen fund manager would like to (sub) underwrite all/ part of the rights issue on behalf of a unit-linked fund. The fund would receive a fee (e.g. 1% of the value of the rights issue that the fund underwrites). In return, the fund will be required to purchase all/part of the shares that have not been taken up by the market. Rights issues normally involve shares being issued at a discounted price.

If the total holding in the security will become 10% or more of the fund, after the rights issue and underwriting, then prior approval must be obtained from the Chief Executive Officer.

Ability to realise and price assets

- All investments held should be capable of being realisable in the short term, apart from conditional permitted link assets, which should be capable of being realisable within an appropriate timeframe to allow payment of policyholder benefits in accordance with policy terms and conditions.
- All investments held should be such that the value of the relevant internal linked fund can be determined fairly and accurately..
- All investments, other than for funds that are restricted to Defined Benefit schemes only, must be of a type that comply with the requirements of COBS 21.

Environmental Social and Governance (ESG)

A copy of the abrdn Life Engagement policy can be found on our website under Literature and Policies: <https://www.abrdn.com/en-gb/institutional/funds/our-life-fund-range>. Links to fund specific ESG disclosures and investment approaches can be found in the Unit-Linked Fund Range - Fund Specific Guidelines section for the relevant funds.

Cash management

abrdn Life's funds obtain market exposure in line with the investment objective with the flexibility of holding small amounts of cash. Directly invested funds and funds of funds can normally hold up to 5% in cash, with the exception of real estate funds which can hold higher proportions of cash. All the other funds (feeder funds) can normally hold up to 2% cash. During the early stages of a fund's launch and/or where the fund is small, for the purposes of cash management the fund may deviate from the investment objective limits, usually by holding more cash holdings. Cash is normally invested in the abrdn Liquidity Fund (LUX) - Sterling Fund or held with the bank which acts as custodian to the funds.

Borrowing

Borrowing must not be used to gear or leverage a unit-linked fund unless:

- a. the borrowing is on a temporary basis and for small amounts, no greater than 2% of the value of the unit-linked fund; or
- b. the borrowing is authorised by the abrdn Life Board

The abrdn Life Board should be advised of any borrowings above the 2% limit.

Unlisted securities

Subject to other guidelines, no more than 5% of any one fund should be invested in unlisted securities.

Collective investment schemes

An unlimited proportion of a unit-linked fund can be invested in units of regulated collective investment schemes and an unlimited proportion of the units in issue in individual collective investment schemes provided those schemes satisfy the requirements for a UCITS or Non-UCITS Retail Scheme (NURS). Other types of collective investment schemes can be held in accordance with any limits or other requirements of the permitted link rules. Funds that are restricted to Defined Benefit schemes only have more flexibility and are not subject to permitted link rules.

If the fund invests in units or shares of other Aberdeen managed funds then zero charge units or shares will normally be purchased to avoid double charging of management fees. If fee paying units or shares are purchased, then the management fee must be rebated to the fund. No holdings may be purchased in collective investment schemes that are not managed by Aberdeen without the approval of the abrdn Life Chief Executive Officer.

Exposure to the Aberdeen Group plc

Other than investments in authorised collective investment schemes managed by a company within the Aberdeen Group plc or accruals of monies owed by any company within the Aberdeen Group plc, abrdn Life shall not invest in shares or debt of Aberdeen Group plc.

The concerns here relate to the “conflicts of interest” issue and also the Companies Act issues that arise if a subsidiary owns shares in its parent.

Eligible markets

The directly invested funds may invest via markets determined by the investment manager (aIL) in accordance with a robust governance process. aIL operates a Permissible Investment Universe

(PIU) framework which details the instruments that all Funds may invest in (subject to their individual mandate constraints) and also sets out jurisdictions and specific markets that funds are able to invest into. Country reviews are undertaken which then forms the basis of the decisions taken on countries and markets to determine instruments and markets that Funds can invest in.

abrdn Life funds may invest up to 5% in markets that are not detailed in the approved securities markets. Any exposure must be aggregated with any limits on permitted investments held that are not realisable within the short term.

Risk models and statistics

The fund factsheets provide information on risk models and statistics for funds and can be found on our website <https://www.aberdeeninvestments.com/en-gb/institutional/funds/our-life-fund-range>. For the Buyout Ready Credit and Liability Aware Range of funds, which are available to Defined Benefit Pension Schemes only, Data Sheets are produced as an alternative to Fact sheets. These are available by contacting a member of the UK institutional team at ukinstitutionalall@abrdn.com

Dilution

The directly invested funds operate a single swinging price (dilution adjustment) to protect policyholders from the effects of dilution. There are currently no dilution adjustments at the top fund level for the majority of fund of funds and feeder funds but dealing in the underlying funds may attract dilution adjustments. Where underlying funds do not attract dilution via a swing price mechanism, but rather via an Anti-Dilution Levy (ADL), the feeder funds may attract a dilution charge to reflect the ADL being applied to the underlying funds.

Dealing

The valuation point and dealing cut off time for each fund can be found in the Fund Data table in Appendix 1 or by speaking to the abrdn ICS team at SS&C. Investors should be aware that switching between funds with different valuation points and dealing cycles may lead to the investor being out of the market for a period of time while the transaction is processed. The abrdn Life Dealing Guide outlines additional information and is available on the website.

The value of investments and the income from them can go down as well as up and investors may get back less than the amount invested.

The information provided in this Document relates to the products and services of abrdn Life and Pensions Limited (abrdn Life).

abrdn Life and Pensions Limited is registered in England and Wales (03526143) at 280 Bishopsgate, London EC2M 4AG. abrdn Life and Pensions Limited is authorised and regulated by the UK Financial Conduct Authority and regulated by the Prudential Regulation Authority in the United Kingdom.
